WASHINGTON - Key Democrats in Congress have introduced lègislation to force Japan, Brazil, Taiwan and South Korea to trim their trade surpluses with the United States or face stiff new tariff penalties.

The legislation, submitted Wednesday to the Senate and scheduled to be introduced Thursday in the House, is expected to serve as the battleground this fall over the growing demand to protect American jobs.

The Rengan administration de-nounced the legislative proposal as "protectionist" and threatened a veto if it passed Congress. Privately, administration officials expressed concern that some version of the bill would be approved and some wondered whether there might be enough votes to override a

The legislation would require the four countries to cut trade surpluses with the United States by 5 percent of 1984 figures, or face a punitive 25-percent additional tariff on all exports to the United States beginning Oct. 15, 1986.

The bill also would require the United States to charge both Japan and the European Community with unfair trade practices in proceedings before international trade bodies, and mandate action to lower the value of the dollar. The decision-making authority for trade policy would be taken away from the dent and centralized in the U.S. States Trade Representative.

The main authors of the bill include Representative Dan Rostenkowski, Democrat of Illinois and chairman of the House Ways and Means Committee: Representative Richard A. Gephardt of Missouri, a key figure in the Democratic

Growth Figure In U.S. Revised **Down Sharply**

By John M. Berry

WASHINGTON - The sluggish U.S. economy, hurt by the rising trade deficit, grew at a weak 1.7-percent annual rate in the second quarter, the Commerce De-

partment reported Thursday.

The gain shown in the preliminary estimate for the gross national product, after adjustment for infla-tion, was substantially lower than the 3.1-percent estimate several weeks ago in the department's "flash" figure.

The downward revision was due primarily to greater weakness in trade than had been expected and to businesses adding to their inventories more slowly.

While forecasters expect somewhat faster growth in the second half of the year, there is no sign of it yet, according to private and Reagan administration economists.

Real GNP rose at a 0.3-percent rate in the first quarter. Thus, in the past six months the economy has been expanding at a 1-percent an-nual rate, far below the 4-percent rate predicted by the administration in its forecast last winter. In the latest four quarters, growth has been only 1.9 percent.

In a separate report issued Thursday, the Federal Reserve said that industrial production rose 0.1 percent in June, the same as the month before. The slight increase underscored the difficulties the nation's goods-producing industries were facing because of the worsen-ing trade deficit, analysts said.

The White House, which often issues a statement about changes in major economic indicators, had no comment about the GNP figures. Commerce Secretary Malcolm Baldrige said that the latest estimates indicated "some pickup in production from a flat first quarter.

The gain, however, was less than estimated a month ago, primarily reflecting downward revisions in inventory investment and net ex-

Mr. Baldrige said the estimated real volume of exports last quarter fell at an annual rate of 12.5 percent while imports rose at a 1.4percent annual rate.

Meanwhile, in another day of testimony before Congress, Paul A. Volcker, the Federal Reserve chairman, warned that the United States, "in a very real sense almost can't afford" to try to reverse the trade deficit by means of a cheaper dollar without simultaneously re-ducing the federal budget deficit. Mr. Volcker said that if the trade

The dollar rebounded Thursda in New York. Page 11.

deficit fell, so would the inflow of foreign capital that has helped hold down U.S. interest rates. If pressure on credit markets is not relieved by cutting the budget deficits when that foreign capital slows down, then interest rates could rise

He indicated that a sharp decline in the dollar could endanger the central bank's anti-inflationary

His remarks helped stabilize the dollar's value Thursday on foreign exchange markets. It has dropped about 12 percent since February. An administration economist

said the surge in money-supply growth in the past nine months should get the economy moving. "I look for it almost any day," he said. "It's a question of time."

GNP Leak Reported

Commerce Department officials said Thursday that advance word on the GNP was disclosed to the financial community about 17 hours before it was officially re-leased Thursday morning. The Associated Press reported from

Mr. Baldrige said the disclosure was being investigated by the de-partment's inspector general.

The government goes to great lengths to ensure that economic reports are not released early because of potential impact on financial

Mr. Baldrige said he had no evidence that advance word on the GNP report had affected financial trading Wednesday afternoon, although there was a rally in the New York bond market late in the day. We continued to consume and Bonds often gain investors' favor foreign suppliers making up the tivity in the belief that interest rates difference," he said.

Reagan Test Urged in March, Doctor Says

By Lawrence K. Altman

New York Times Service
WASHINGTON — A medical team that examined President Rouald Reagan recommended in March that he receive a thorough examination of his colon as soon as possible, the team's leader has as-serted. The doctor's statement intensified a debate over the timing of Mr. Reagan's cancer treatment.

The White House contended in response that there had been no recommendation of urgency for a colonoscopic examination in the written report submitted by the

Mr. Reagan did not receive such an examination until last Friday. when surgeons at the Bethesda Naval Medical Center outside Washington discovered a polyp that months. Riots in 1976 that began proved to be cancerous. Since that time the question of

whether the colonoscopy and surgery should have been performed in March has been debated among physicians.

In the eastern Cape region, Ivan Krige, the mayor of Port Elizabeth, Contributing to the debate, a vice president of the American Cancer Society said that Mr. Reagan's physicians had misinterpreted the society's guidelines for when extensive testing for polyps should be done. The president's physicians cited the guidelines among their reasons for not having performed an earlier colonoscopy.

Dr. Arthur I. Hollub, the society

official, said that the guidelines "do not apply to individuals in the stated age group who may have bleeding or the presence of a polyp."

The physician who said his medi-

cal team had called for prompt ac-tion in March is Dr. Waiter W. Everyone is hoping it's not their building first." Irritation on Peres 'Veto'

WASHINGTON - The State Department responded with irritation Thursday to the rejection by Israel of a list of Palestinians pro-posed for talks with the United States on the Middle East peace

Jordan has given the United States a list of Palestinians it wants to be part of a Jordanian-Palestinian group that would meet U.S. officials. Prime Minister Shimon Peres said Wednesday the list was not acceptable.

A department spokesman, Rob-ert Smalley, dismissed the idea of an Israeli veto on the names but said that Washington would do nothing to stand in the way of Israel's goal of direct Arab-Israel peace

Mr. Smalley said that the U.S. decision on a meeting will be tak-en in the light of consultations with our friends in the area but it will be

He said that "the question of a veto over our decisions by one or

another of the parties has come up. This is not the way we proceed." The statement made clear Washington's initation at Mr. Peres's swift public rejection of the list on

Israeli television and the disclosure of names said to be on the list by Israel's state-mn radio. Progress in the peace process had to be based on mutual trust and full confidence and required "a certain

amount of discretion," Mr. Smalley Mr. Smalley said there would be many incremental steps toward the goal of direct negotiations between Israel and the Jordanians and Pal-

"We should all try to step back a bit, and not try, to react to each

individual event or occurrence as if it were somehow outside the process," he said. Any steps would be judged in the

light of the goal of direct Arab-Is-raeli peace talks, Mr. Smalley said. "If something will help the pro-cess, we will do it," he said. "If it will hinder the goal of direct nego-

tiations, that obviously is some-thing we will try to avoid." The idea of a U.S. meeting with a joint Jordanian-Palestinian delegation was proposed by Jordan and

The Associated Press

BRUSSELS - Prime Minister Willried Martens, who offered his government's resignation earlier this week, said Thursday that gen-eral elections would be held Oct. 13, about two months earlier than originally scheduled.

Speaking to the Chamber of Representatives, the lower house of Parliament, the prime minister also announced a scaled-down legisla-tive agenda for the final weeks of the government's existence.

The crisis arose because of a dispute over the government's handling of a soccer not May 29 in Brussels in which 38 persons were killed and more than 450 injured. As a formality, King Bandonin must approve the date of the general election, which originally had been set for Dec. 8.

The election date was changed because of a crisis that broke out Monday when Deputy Prime Min-ister Jean Gol submitted his resig-nation and five other cabinet mem-

bers from his party followed him. Mr. Gol acted because of the refusal of the interior minister, Charles-Ferdinand Nothomb, to step down in acknowledgment of responsibility for the security operations at the stadium where the soccer riot broke out. The interior ministry is in charge of all police

On Tuesday, with his four-party coalition fractured, Mr. Martens offered to dissolve the government, but the king refused to accept the coalition's resignation. Mr. Mar-tens was instructed by the king to set out a limited legislative agenda and to continue in office with the

The cabinet will ask Parliament to act on two main programs jobs and taxes, postponing a deci-sion on a constitutional reform and canceling the summer's usual bud-

get drafting exercise. In his address Thursday to Parliament, Mr. Martens made a reference to the squabble between Mr. Gol and Mr. Nothomb that nearly

toppled his government.

Even when no political mistake has been made, a politician may judge that his moral duty is to re-sign," Mr. Martens said. "He also can opt for the contrary. I see that the interior minister made the sec-

ond choice. It's up to him."

The prime minister said the government's remaining tasks were between Moslem and Christian milimited but important, because "decisions are needed to pursue the country's economic and social re- a Syrian-backed security plan for covery and complete the constitution reform giving more powers to

Enemistic regions. Mr. Martens said the program would be limited to one bill aimed at creating more jobs and another francs (\$1.3 billion) over four years.

The lower house began debating the program Thursday afternoon, with the Senate to take it up Friday. Both houses were expected to adopt it this week.

Trade Tariffs Proposed

ROME (UPI) — The judge presiding over the papal conspiracy case suspended Thursday's session after a defense attorney engaged in a shouting match with the prosecution's principal witness, Mehmet Ali

Agea.

Judge Severino Santiapichi lectured Valerio Vianello, the defense attorney for Musa Serdar Celebi, and stopped the exchanges by suspending the proceedings. Mr. Agea four other Turks and three Bulgarians are on trial for conspiracy in the May 13, 1981, assassination attempt against Pope John Paul II.

The uproar began when Mr. Agea and Mr. Celebi were being questioned about a meeting Mr. Agea said they had in Milan five months before he shot the pope in St. Peter's Square. Mr. Agea testified that Mr. Celebi was his contact with another Turk, Beleir Celenk, implicated as an intermediary in the plot. Mr. Agea said Mr. Celebi gave him the equivalent of \$400,000 in Deutsche marks to kill the pope. Mr. Celenk is being held by Turkish authorities after his release by Bulgaria.

Marcos Wants Panel to Study U.S. Pact

MANILA (UPI) - President Ferdinand E. Marcos called Thursday

MANILA (UPI) — President Fordinand E. Marcos called Thursday for a commission to consider renegotiating an agreement permitting U.S. bases in the Philippines. The United States maintains two bases north of Manila — Clark Air Base and the Subic Bay Naval Base. The Defense Department considers them vital to Western defense.

"I have my own ideas about this whole thing on military facilities," Mr. Marcos, 67, told graduates of the National Defense College during a televised ceremony at the presidential palace. He asked: "Do we really abrogate the military defense agreement? Do we really renegotiate a new agreement or just abrogate it? These are things that would bear studying and investigation."

The U.S. House voted last week to cut the Reagan administration request for \$100 million in military aid to the Philippines in 1986 to \$25 million, while increasing economic aid from \$95 million to \$155 million. The Senate, however, has endorsed the administration request.

The aid is provided for in a five-year pact expiring in 1989 calling for \$475 million in economic aid and \$425 million in military assistance in exchange for Washington's use of bases in the Philippines.

Bonn Lists 82 Tainted Austrian Wines

BONN (Reuters) — The Health Ministry issued Thursday a list of 82 Austrian wines shown by tests to contain the illegal sweetener diethylene-glycol, a toxic chemical in vehicle anti-freeze.

West German and Austrian authorities said after a meeting in Bonn that the list, based on 192 positive tests, was provisional and warned it would have to be constantly updated.

Thousands of liters of Austrian wine have been seized since the scandal broke last week, threatening the Austrian wine industry with ruin. Austrian wines containing anti-freeze have also been traced in the Netherlands and Switzerland, and East German authorities have been

Delegates Criticize Maureen Reagan

NAIROBI (Reuters) — A group of American delegates at a United Nations women's conference said Thursday that President Rouald Reagan's daughter, Maureen, was not representative of the American women at the meeting Ms. Reagan beads the 29-member official U.S. delegation at the conference, which is reviewing the achievements of the UN decade

In a petition handed to the official delegation, the Women Coalition for Nairobi said no member of the delegation was qualified to speak for Copies of the petition were not made available to the press but the

spokeswoman for the group, Alva Buxenbaum of New York, said: "We want to make it clear that Maureen Resgan doesn't represent the vast majority of United States women."

Budget Talks Broken Off; Conferees **Pessimistic**'

By Helen Dewar

Washington Post Service
WASHINGTON — House and Senate negotiations for the 1986 budget were on the verge of collapse after an acrimonious session in which Senate conferees rejected proposed compromise from the House, and said they saw little hope of reaching an agreement.

The talks were broken off indefi-

nitely Wednesday night. Negotiators had worked six months to produce more than \$250 billion in spending reductions to cut budget deficits by half over the next three years. The deficit was at \$156.6 billion in the first quarter of 1985 and is projected at more than agreed that the talks had hit a low point and that the outlook for agreement was bleak.

Pete V. Domenici, chairman of the Senate Budget Committee, said. "Frankly, everywhere I turn, I don't see a way to go." Mr. Dome-nici, Republican of New Mexico, said the talks would resume when "we have something to talk about."

House negotiators urged the sentors not to break off the talks, but epresentative William H. Gray 3d, the House Budget Committee chairman and a Democrat of Pennsylvania, said that he, too, was "a

However, Representative Delbert L. Latta of Ohio, the ranking Republican on the House budget panel, emerged from a private con-ference of House and Senate mem-bers Wednesday night saying he thought a resumption of the talks was possible next week.

The House speaker, Thomas P. O'Neill Jr., Democrat of Massachusetts, said he was "disappointed that the Senate decided to pull away from the conference table."

"If President Reagan can negotiate with General Secretary Gorba-chev," Mr. O'Neill said "then the Senate can negotiate with the House. Let's get back to the table."
The House offered Tuesday to make \$24 billion in additional do-

mestic spending cuts over three years while moving closer to accep-tance of the Senate and White House demands for a military budget that would give the Pentagon increases next year covering all of The House offer was rejected as

U.S. Hopes to Inspect 2 Soviet Helicopters in Pakistan

ISLAMABAD - The United States is optimistic that Pakistan will allow U.S. military experts to inspect two Soviet-made helicopter gunships that were flown to Pakistan by defectors from the Afghan Air Force, Western diplomats said

The heavily armored Mi-24's, code-named Hind by the Western military alliance, landed at a Pakistani border town last Saturday. The seven Afghans aboard asked for political asylum.

The gunships, reported to be the rockets, as well as Soviet Union's most advanced, are heavy machine guns. armed to strate ground forces or to Their heavy armor plating makes

them resistant to gunfire.

The arrival of the Mi-24's in Pakistan was the first time that this type had fallen into the hands of a nation allied to the West, diplo-

"Obviously our military people want to get their hands on these things if at all possible," said a Western diplomat, who asked that his name not be used.

Washington Past Service HONOLULU — The Soviet Union supplied North Korea with advanced MiG-23 jets for the first time this spring, suggesting a change in military relations be-tween the two allies, according to U.S. military officials.

North Korea is believed to have sought advanced warplanes for years, but the Soviet Union and China were cautious about supplying materiel that might aid or encourage the militant North Koreans to undertake an attack against South Korea

A Soviet decision to supply a substantial force of MiG-23s, the first six of which were detected in

May, is believed by the U.S. offi- arms race between the two Koreas. cials to have resulted from the visit to Moscow in May 1984 by Kim II Smg, the North Korean leader. The visit, the first by Mr. Kim in

20 years, was interpreted as a sign

of improved relations. Some U.S. specialists on Asia had been expecting the Soviet Union to supply North Korea with MiG-23s, especially since the Reagan administration began selling F-16s to South Korea. The delivery of the first of 36 F-16s is scheduled for

April.

The Carter administration had declined to supply the plane to the

Air-India Tape Yields Few Clues

BOMBAY — U.S. aviation experts said Thursday that an abrupt end to a voice recorder tape had not established whether an Air-India Boeing 747 jet that crashed last month had

been bombed. R.V. Kunzman, a senior engi-neer from the aircraft manufacturer, said, "The replay showed normal cockpit conversation between pilots and ground con-trol for the 30 to 32 minutes den increase in sounds and the

tape abruptly ended."
Paul Turner, a voice recorder expert from the U.S. National Transportation Safety Board, said it was too early to draw any conclusion. The Press Trust of India reported Wednesday that computer printouts from the Boeing 747's digital flight data recorder had established that an

explosion occurred when the airplane crashed June 23. China to Speed Amends

A scene from Nureyev's "Washington Square" at the Paris Opera.

From Lifar to Nureyev and the Moderns, Busy Days on the French Dance Stage

by Anna Kisselgoff

EW YORK - "For centuries, Paris was a dance capital and it remains so as well today." This sentence by Jacques Chirac, mayor of Paris, introduces an exhibition in the French capital, entitled, "Four Centuries of Ballet in Paris." Whether Chirac could have so confidently affirmed that Paris was a dance capital 10 years ago is problematical. Nonetheless, things have changed. The goings-on glimpsed on a visit in the last mouth, for instance, have been unusually varied.

Rudolf Nureyev's new ballet version of Henry James's novel, "Washington Square," was on view at the Paris Opera Ballet, where was on view at the Paris Opera Ballet, where he is artistic director, and Maya Plisetskaya, the Bolshoi ballerina, was appearing at the Theatre de l'Odéon as a guest in the title role of Iean Coctean's and Serge Lifar's 1950 "Phèdre" with a company from Nancy. A major event of the season is obviously the Paris Opera's revival of Meyerbeer's opera

Robert le Diable" for the first time since RODERT IE LIBROIS TO THE INSTITUTE SINCE
1893 — although its historically celebrated
Romantic ballet scene, "The Ballet of the
Nuns," has been unrued into a parody replete
with a Folias Bergère type of bare-breasted
female ensemble and a campy joke (the hero
rejects the advances of four monks).

Yet alcohol the root four monks).

Yet a look at the past by no means defines the emphasis in French dance today. The many modern-dance companies that emerged in the late 1970s are consistently in the public eye. Even general advertisements, as for men's clothing, in news magazines, can include a view of dancers in layers of practice clothes. Obviously, the ad agencies who provide market profiles know that images of dancers, here specifically identified as mod-ern dancers in a studio, can help sell even an

wmelated product.

Dance is a household term now in French life, thanks in part to the spread of govern-ment-subsidized companies throughout the country. Most of these are small modern-dance troupes. And while it may be unfair to generalize from a patchwork of random

came from the modern-dance side rather than the ballet I saw.

In the city of Angers, the Centre National de Danse Contemporaine, under its new young director, Michel Reilhac, presented one of its commissioned premieres. This was "Le Royaume Millenaire" by the Esquisse company of Joelle Bouvier and Régis Obadia. When this troupe appeared at the American Dance Festival in 1983, its restricted themes and restricted range of movement. themes and restricted range of movement seemed to promise a dead end. Happily, the two young choreographers have avoided a cul-de-sac. Their new work has an imaginative poetic theatricality — suggesting the remnants of existence in a decaying castle. There was one grand moment - when 10 Persian carpets cascaded down from the ceil-

EANWHILE in Paris, Magny Maago, mixed Mahler and pop music to spectacular and poignant effect in her view of civilization and its discontents in "Babel-Babel." This dance theater piece should be included when this company comes to the Civi Center here in February.

comes to the City Center here in February. interesting, even brilliant ideas. Yet it func-tions best in concept rather than in execution. As a total production, it fails. The choreography is busy and inexpressive of a dramatic, emotional situation. There is also a disastrous piece of decor that occasionally bisects the stage and prevents some in the audience from seeing the action. The dancers do not all seem at ease in roles that, even if "explained" to them, are too remote from Henry James's own characterizations to co-

And yet Nureyev has created some exciting ensemble scenes that suggest where he could have gone right rather than wrong in another ballet. These are phantasmagonic and delirious passages. Some are dreamlike, ghostly episodes that refer to the characters lives. Yet most are outwardly irrelevant and cartoon-like images from American history. Significantly, this is the America of the Ku Kinx Klan seen by Europeans, and it is an image of America that is decidedly at odds with James's own sensibility.

By splicing in these phantasmagoric access into the narrative — which is an intimate tale involving four main characters - Nureyev actually ends up with two ballets. A straightforward narrative about a young heiress in mid-19th-century New York society — betrayed by a fortune-hunting suitor, her rigidly protective father and her meddlesome aunt - is turned predominantly into a superficial commentary on 19th century America.

James does not include such scenes in his own novel. There are no references to the Pilgrim Fathers, marching bands, cowboys, Fourth of July celebrations, black men with dollar signs on their trousers or Kn Klux Klan processionals in James's story. Why has Nureyev used such figures, who cluster occasionally around a huge head of a Stame

Mostly, one suspects, because such images are inspired by the music that he has chosen - selections from Charles Ives that com-

Arab East and Roman West Mingle at Jerash Festival

by Rami G. Khouri

Herald Eribune.

MMAN — If you happen to be in Jordan this or any other July, you would do well to drop by the magity of Jerash and watch dancers twirl, singers sing, actors prance, poets declaim, and bistory stand on its head.

For 16 days this month, the fourth annual Jerash Festival of Culture and Arts brings the ancient city in northern Jordan back to life with a rich and varied fare of performing and visual arts from 21 countries

Two thousand years ago, political, eco-nomic and cultural forces from East and West collided, then meshed, at Jerash and other eastern provincial cities, as the Roman Empire expanded to the southeast from the first century B.C. to the third century. The synthesis of Greco-Roman culture and the indigenous Arab culture left its mark in art, urbanism and architecture. Today, this can be appreciated in a string of Greco-Roman provincial cities throughout Jordan and Syr-ia, whose sprawling stone ruins testify to the timeless human instinct for beauty and pros-

In a great historical irony, the Jerash Festival has revived the city's role as a meeting place of culture and art from East and West. This time, however, the initiative has come from the Arab East, and not from the Roman West. The drama of human contact is still there, but with some important differ-

Today, the impetus for cross-cultural contact is not conquest, but human communication; the instruments are not weaponry or trade, but song, dance and music; the result is not imperial expansion, but a celebration of the universal quest for pleasure and understanding through art and the spirit of

numan creativity.

The Jerash Festival has quietly snuck up into the big league of international arts festi-vals. It is by far the biggest single such festival in the Middle East and is thought to be the second biggest international festival (after the Edinburgh Festival) if measured by the number of performances and exhibi-

by the number of performances and exhibitions in the program.

It has sensibly refrained from international or even regional publicity up to now to
concentrate instead on mastering the mechanics of putting on such a large show for a
sustained period. This year, the 16-day festival boasts 88 different troupes, performers
or exhibitions from 21 countries, putting on
a total of 257 performances. It began this
year on July 11 and runs to July 26.

At total of 1,500 Jordanian participants
and 800 other Arab and foreign performers

and 800 other Arab and foreign performers portion delty shows between 5 P.M. and 1 A.M., entertaining an average of 10,000 to 12,000 visitors a day. Some 200,000 people are expected to visit the festival this year, not of them from within lorder. Next were most of them from within Jordan. Next year, the festival organizers, in cooperation with the Jordanian national airline Alia, the state tourism authorities and private travel agents, will launch an international campaign to attract visitors to Jordan during the period

At any one time during the festival, at least 10 performances or art and crafts exhibitions are on offer in different corners of the ancient city ruins. In most cases, the Roman structures from the first and second centuries are used as performing arenas, incinding the handsome South Theater, the immense Oval Plaza, the steps of the Temple of Artemis (daughter of Zeus, sister of Apollo and patron goddess of the Roman Gerasa), the underground vaults of the Temple of Zens, and several of the colonnaded

HIS simultaneous use of all quarters of the Roman city not only allows the large number of daily visitors to be accommodated, but also gives the festival its accommodated. special, and very lively, atmosphere. Throughout the warm late afternoon and evening hours, as families with their children stroll throughout the vast ruins of Jerash, they stop for a snack or a soft drink; rest for a few moments on the side of a toppled Roman Corinthian column capital; pause for a few minutes to watch a dance troupe, listen to a poetry recital, view an archaeological or art exhibition, or watch local craftsmen and women at work; or simply wander aimlessly amid the bustle of creativity that the old stones of Jerash have not experienced since the Emperor Hadrian visited the city in A.D. 130, during the heyday of its wealth

and splendor. From its inception, the Jerash Festival was designed as a nonspecialized and "popular" festival, with a wide variety of events catering to every possible taste. This year, for example, the festival has 12 different theatrical productions, including puppet shows, an ambitious pan-Arab play with actors and staff from seven Arab countries, French

marionettes and modern dance troupes from Belgium and Lebanon: 19 different musical groups from Jordan and around the world, including the United States, Australia, Canada, Poland, Tunisia, Iraq, Egypt and Saudi Arabia; 14 folklore troupes from Jordan, Palestine, Egypt, Turkey, the Soviet Union, Spain, and the United States; a show of Iraqu fashions throughout the ages; the London City Ballet and the Brigham Young dance group; crafts exhibitions from Jordan, Tur-key and Iraq; an exhibition of Jordanian fine arts, and another of local antiquities from the last 500,000 years of human civilization in Jordan; a children's Arabic book fair and puppet exhibition; and, as a sign of the times, a display of Arabic-language "cultur-al" computer software.

OURTEEN other countries wanted to participate this year, but could not be accommodated for lack of space, according to the festival director, Mazen Armouti. Next year, the festival will probably be expanded to a full month to satisfy the interest shown by both performers and audi-

Armouti, like everyone else involved in organizing the Jerash Festival, serves as an unpaid volunteer. His regular job is as chairman of the journalism and communications department at Yarmouk University, in the north Jordanian city of Irbid. It was at Yarmouk that the festival idea was born five years ago, when Jordan's Queen Noor suggested it to a group of students and professors in 1980. A three-day pilot festival in 1981 was expected to draw only 5,000 to 10,000 visitors, but more than 100,000 came. The festival organizers quickly realized that there was great demand among the Jordanian public for such diverse cultural fare. The annual festival was designed to meet that lemand, but also to allow Jordanian performers and artists the chance to be exposed to large Jordanian audiences and to quality performances from around the world.

The festival organizers are particularly keen to maintain the diversity of offerings, "so that Jordanians who may not have the means to travel abroad may have access near home to a broad range of the best in international music, folklore, dance and theater,' Armouti said.

Another aim of the festival is to prod the development of local artists, whether dramatists, dancers, musicians, poets, painters or folklore troupes. The festival committee con-tributes some \$200,000 a year to local groups chosen to perform at the festival, who are also subjected to the kind of critical appraisal that is vital to their artistic development,

"It's a long-term process," notes Leila Sharaf, deputy chairwoman of the Higher National Committee for the Jerash Festival. We hope the Jerash Festival will be a catalyst to prod the development of culture and the arts in Jordan, and to provide an attracnew talents to bud, " she said.

Rami G. Khouri, former editor of the Jordan Times, has recently completed books on Jerash

The Crillon: A Classic Renewed

by Paul Goldberger

ARIS - You could put almost anything behind the facade of the Hôtel de Crillon and it would be all right. For no other hotel in the world has a front like the Crillon: It sits behind the great flank of classical facades designed by Jacques-Ange Gabriel in the mid-18th century for the northern side of the Place de la Concorde. It is as noble a site as exists in Paris, directly on the square that is the city's physical and spiritual heart.

The western end of these monumental facades - 10 Place de la Concorde - has housed a luxury hotel since 1909, two years after the descendants of the Comte de Crillon sold the property that the count had purchased in 1788. The hotel has honored the count with its name ever since, though there have been years when the count, had he been alive, might well have wondered whether he would not have preferred to decline the honor. Though the Crillon's location and history have always made it one of Paris's most celebrated luxury hotels, in some peri-ods its quality has been nowhere equal to its legend or its architectural splendor.

The worst years were surely the 1960s and

the early 70s, when the Crillon seemed not only lackluster by badly cared for as well. Now, a new management, under the owner-ship of Jean Taittinger of the Champagne family, has completely renovated the hotel,

making it one of the city's best.

The renovation, which began in 1981 and is now basically complete, is part restora-tion, part alteration. It is sensitive to the architecture, but not slavishly so; the aim of Taittinger, along with the designer Sonia Rykiel, who served as a consultant, and Philippe Roche, the general manager, was gently to balance the Crillon's historical dig-

That is essentially what they have done. Entering the Crillon now one does not come upon the hushed quiet of the Ritz or the more hard-edged hanteur of the Bristol, or the self-assured briskness of the Plaza-Athence, the city's best-oiled hotel machine. The Crillon is something else — a monumental piece of classical architecture behind which sits a hotel of vibrant elegance.

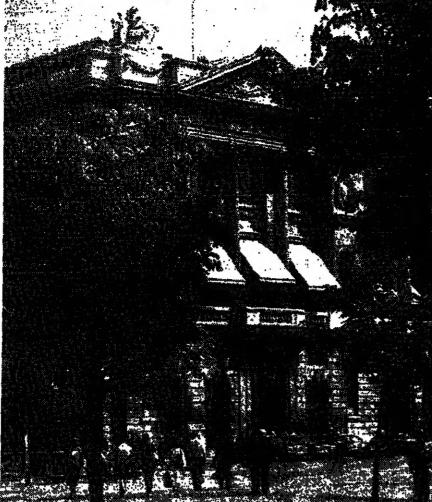

The public rooms on the ground floor have been reorganized and in some cases completely rebuilt. One of the finest interior spaces, the great salon of marble and mirrors fronting on the square, is finally what it should always have been — the hotel's formal dining room. It houses Les Ambassadeurs, the Crillon's main restaurant, which has two Michelin stars.

There is a rich glow to Les Ambassadeurs; it is a truly grand space, as much like a ballroom as a dining room, although the arrangement of tables preserves a sense of intimacy, and the room never feels over-

whelming.
The result is certainly not the soft and cool aura of the private Parisian town house, to which so many hotels aspire; the lobby pulsates with a crisp, sleek luxury, made more contemporary still by a grouping of lush, modern Italian leather chairs. The chairs are the one mistake, for they push the lobby just a bit too much toward an American kind of aesthetic, one that mixes styles and periods

with energetic abandon.

But if the lobby's decor wavers a bit in the direction of glitter and confusion, the room s nonetheless welcoming, and it connects with the lounge next to Les Ambassadeurs. where tea and drinks are served, to form a generous series of public spaces. Beyond the lobby, which was created out of a former smaller lobby and an obsolete carriage entrance, is the bar and a smaller dining room, called L'Obelisque. There the Crillon provides an amenity that most luxury hotels disdain — simple, relatively informal dining at the same level of quality as the main restaurant. The menu at L'Obélisque, like that of Les Ambassadeurs, is the work of Jean-Paul Bonin, the chef, and the room,

The Hôtel de Crillon.

which occupies part of the former main dining room, is handsome.

The guest rooms have been well restored, with a mix of antiques and reproduction French furniture, and they are comfortable, not enormous. The new bathrooms are lined in travertine marble, which is luxurious but seems cliched to American eyes; one misses the great tiled bathrooms of many other Parisian luxury hotels.

Relatively few of the 200 rooms face directly onto the Place de la Concorde; since the hotel stretches far back along Rue Boissy d'Anglas, which runs into the square, most rooms face either this side street or interior courts. Double windows insulate the rooms from the ceaseless traffic, so noise alone is no reason to request an interior room, but the courtyards are exceptionally pretty, and the views onto them, at least from the upper

floors, are classic Parisian roofscape vistas. Nothing, however, can equal the view from those treasured rooms on the Place de la Concorde, many of which are among the hotel's 48 suites. All have been furnished superbly, particularly the grands apparte-ments, the extraordinary suite on the first floor was long the hotel's banquet rooms. There is no hotel room anywhere like this suite. There may be larger ones, though it is hard to imagine them, but there are surely none better situated. On this level, neither too high nor too low, the traffic slips away, silently, as the great monuments and the immense, flowing space of the Place de la Concorde, space that flows on and on like

the water from a fountain, fill the eyes. One gets a similar sense from any room at the Crillon, or from walking out of the hotel onto the square in the morning, and return-ing at night. However fine the hotel's decor, service and ambience have become, the greatest thing about it is still its location.

Few cities have sources as central to their eography and their history as the Place de la Concorde is to Paris. It is here that the two great axes of the city intersect, the vista from the Louvre through the Arc de Triomphe

trip from Los Angeles.

The great pleasure is to drive through the orange groves, generally in the direction of

two citrus ranches are open to the public. From Los Angeles, there are three routes into the Inland Empire. The least interesting, and quickest, is the Foothill Freeway. The econd is Foothill Boulevard, also known as Route 66 from its dustier, more romantic days. A way of combining some efficiency and some color is, perhaps, to take the Foot-hill Freeway to an eastern segment of Foot-hill Boulevard, in the Claremont-Upland end of what remains of the citrus belt.

FOOTHILL BE VO.

An Empire Built on Oranges

by Joseph Giovannini

ARLY in this century, Charles F. Lummis, the noted historian of Southern California, said that for the region the navel orange was not only a fruit but a romance as well. More recently, it was termed an aesthetic. Indeed, the owners of groves cultivated not only the navel orange but also a healthy outdoor life and a tidy profit, all within a landscape of snow-capped mountains and foothills. Often iving in elaborate homes set amid the groves, the ranchers were of the gentleman variety, originating from Back East.

At their peak during the first decades of this century, the groves made up what was called the Inland Empire, which carpeted the foothills of the San Gabriel and San Bernardino mountains, from Pasadena to Red-lands. Riverside and Redlands were the principal cities in this agricultural area. Since World War II, the acreage occupied by groves has been reduced by a combination of smog, rising production costs, increasing taxes and the sale of land to developers for single-family houses. But there still are hun-dreds of acres of land devoted to the navel orange, and they form one of the least celebrated, most evocative aspects of Southern California. The areas can be visited on a day

the hills or mountains. The secret of finding the older places, in Redlands, for example, is to look for windbreaks of eucalyptus or clusters of palms, planted decades ago and now mature. Being out on the road leads the how mature, being out on the road leads the traveler to pockets of old Californiana — houses, outbuildings, packing sheds, fruit stands — about which even many native Southern Californians know little.

In Redlands, sites open to the public in-clude the chateau-like Kimberly Crest mansion and the very Victorian Morey Mansion -bomes associated with the citrus industry. Some years ago, the threatened Edwards Mansion, built in 1890, was removed to a rove of its own, behind the San Bernardino County Museum, and is now an elaborate nine-room Victorian restaurant that salutes the history of the area with dishes that feature the orange. In Riverside, the Victorian Bettner house of 1892, now the Riverside Heritage House, can be visited; unfortunately, the venerable Mission Inn is closed for a wo-year-long conversion into what is described as a world-class hotel. In Corona,

The most romantic and appropriate way into the orange country, however, is the

A citrus-belt building in native stone.

railroad: Amtrak trains from Los Angeles Union Station leave downtown twice a day for Pomona and San Bernardino, which is about 15 miles from Riverside.

The orange as a symbol of Los Angeles goes back nearly 200 years, to Spanish Cali-fornia. The San Gabriel Mission outside Los Angeles and, later, many Southern Califor-nia ranchos had orange trees long before California became a state, though the orange was never a major crop during the mission

The navel orange itself — imported by the U. S. Department of Agriculture from Brazil — was introduced in this area only around 1873. It was especially well suited to the drier, hotter footbill areas, from Pasadena through Claremont to Redlands, where there was sufficient water, good loamy or clay soil and little frost. The navel spread quickly from the original parent trees, one of which is alive in Riverside, fenced and commemorated with a plaque at the corner of Magnolia and Arlington Avenues.

The other great Southern California orange, the valencia, was introduced in 1876, and grew well along the cooler coastal belt through Santa Barbara, Ventura, Orange and San Diego counties.

Especially in Highland and East High-

land, Redlands and the Riverside area, there are still spacious homes surrounded by pro-ductive groves. Some of the homes are Vic-torian and Craftsman-style; others, especially toward Claremont, are made of the granite fieldstone "quarried" from fields cleared for planting. While the Victorian houses expressed concerns about propriety and status, the Craftsman and boulder houses demonstrated a respect for health, hard work and

Near the groves, there are industrial pack-

ing houses that are part of this ecology voluminous structures covered in corrugated metal sheets that turn incandescent underthe high California sun. The packing houses are along the railroad tracks that helped open up the area to development. Some of these packing houses have recently acquired a new lease on life, having been bought by large food conglomerates.

In Redlands, there are many of the large houses of this prosperous grove society.

Most have passed into the new era of historic preservation, such as Kimberly Crest and the Morey Mansion, though they are preserved as houses rather than as parts of groves. The groves often have been eroded by subdivision or simple neglect. Unfortunately, there has been little commitment on the part of planning commissions in most of these cities and towns to preserve the groves as a part of. the area's heritage and environment. One effort is the Edwards Mansion restaurant is Redlands. Though somewhat self-conscious. it represents a preservation victory that goes beyond the house to suggest the ideal local-ecology — a substantial house within a substantial grove; the source of the wealth, and the object of the wealth.

FST of Redlands, near La Verne, is the Upland-Claremont area. Here, besides the groves, which still exist in spots north of Footbill Boulevard, there are the best of the region's stone houses, built during the first two decades of the century primarily by professional masons, in signature stone patterns. At first, some of the bouses were corseted into styles derived from the East.

Perhaps the most beautiful of these stone buildings was that done just before World War I for the Pitzer family on North Towns. Avenue at Baseline Road, an expansive hack-enda-type bungalow with an arcaded porch, large boulder pillars supporting a trellis and a Spanish tile roof. The house has a central courtyard. The stones are large, and carefully picked, matched and placed. The apparently rustic nature of the exterior did not stop the architect from including the la conveniences of the 1910s inside, including x-

vacuum system built into the walls. Not far from the Pitzer House are several other stone structures, including the water pumping stations, barns and other ranch-out-buildings. In these areas new housingtracts have taken their toll, but there are still many houses left where stone is featured in porches and chimneys. As yet, all are privately owned and cannot be visited inside They remain, nonetheless, a significant feeture of this landscape.

and the vista from the classical colonnade of

the Madeleine to the Chamber of Deputies

The square is all the more remarkable for being so undefined by buildings; rare is urban space that is not walled in by architec-

ture as powerful and clearly comprehensible

as this. Gabriel's structures, for all of their

monumental splendor, are really just fa-cades, stage sets of stone intended to provide

the one clearly defined edge for the immense

square, which is open on its other sides to the

Tuileries, the Champs Elysees and the Seine.

T all works because these stage sets just

happen to be among the great works of classical architecture in France, and as much a symbol of the Place de la Concorde

as the Egyptian obelisk that has been in the

square's center since 1836. Gabriel's build-

ings, designed in 1758, are a superb composi-tion: Their bases of rusticated stone, above which are long central colonnades and end pavilions topped with pediments, rhythmi-

cally define streets and corners and function

as a solid wall for the square.

It was Louis XV who gave the land for the Place de la Concorde and in whose honor it

was built. Only facades were erected, not out

of laziness but because the king and the architect were more concerned with building

the square than with filling its real estate;

buildings behind the great facades, but they did not want to take the chance that any of

these private buildings have facades that

interfered with the square's overall design.

And so it was that Louis Trouged ourchased

the westernmost end of the facades and built

across the Seine.

Flying Virgin Atlantic: **Quality and Razzmatazz**

by Roger Collis

HAT do cut-price air fares, a luxurious home on a private Ca-ribbean island and an attempt to break the record for the fastest trans-Atlantic sea crossing have in common? They all figure in the business plans of 34year-old rock music multimillionaire, Richard Branson, founder of the Virgin enter-tainment group that launched Virgin Atlantic, the maverick airline, a year ago.

Branson is a consummate publicist with an exalted sense of timing. Three weeks ago Virgin Atlantic, which flies its single Boeing 747 between Gatwick and Newark, celebrat-ed its first anniversary with characteristic razznatazz. At the same time, Branson announced he is throwing open his 74-acre island to showbiz and corporate high fliers as a vacation and conference retreat. And next week, weather permitting, Branson will help to crew the Virgin Atlantic Challenger, a 65loot, 4,000-horsepower catamaran, which should win back the record for Britain in a high-speed dash from the Ambrose Light vessel to the Scilly Isles off the southwest up of England. Target time for the crossing is 66 hours. This would clip nearly 16 hours off the existing record set in 1952 by the liner United States.

According to Branson, sponsorships and TV and video rights have so far covered all but £150,000 of the £2 million (about £2.8 million) needed to finance the project. While major airlines make do with advertising. Virgin Atlantic should get millions of dollars of free publicity from TV coverage during the crossing. That's the "upside," as Branson likes to say. The downside is presumably the danger of hitting an underwater iceberg — a "growler," which can't be detected by radar at 60 miles an hour.

This is the pioneering spirit that has pro-pelled Virgin Atlantic into a second year of operations. Says Branson: "It's gone very well. Our initial investment was a third of our profits in the first year's trading — half of what British Caledonian made last year."

Virgin has taken a cantious step-by-step approach to the airline business. It had an option to hand the plane back to Boeing at the end of the first, second and third years. "We can never be sure we won't have the same problems that Laker had. We've made sure that we can bow out gracefully and pay off our ticket holders should that ever happen," Branson says.) But today the airline has residual rights to a 747-200, which has gone up in value by \$13 million, and Branson has ordered a second plane for delivery in June 1986. This will add four more flights a week to New York and open up a new route to Miami. Virgin now thes a feeder service between Gatwick and Maastricht, the Netherlands, at a round-trip fare of £150, and Branson would like to fly into Amsterdam.

"But we're not going to attempt to become a major international airline unless governments change the monopoly rules," he says. Branson says he went for a quality rather than a no-frills product because he wanted to appeal to the business as well as the leisure market. The actual cost of creating a really quality airline is not much more than running a downmarket airline. People's Express makes about £4 million by charging for food 50-60 million a year, it's much better to get another £25 million in load factor."

Branson chose a 747-200 because it can carry a full load of freight as well as 460 passengers. "We put in seats with an extra two inches of room and trained 150 new girls — rather than girls who'd seen it all before — and mixed them with experienced people, so as to have a fresh approach. We put in the best and and did not be trained and independent of the lectory with electoric best sound and video systems with electronic beadphones in both classes. And better food. For example, we serve garlic bread separate-

ly and fresh fruit salad. It doesn't cost much more, but people remember."

One sincere compliment Virgin has had was in a leaked report from British Airways. According to Steve Harvey, managing director of Inflight Radio in London: "A couple of months after they started, BA sent a manager to check out their flight. His report said that in virtually every sense, Virgin Atlantic had more style, more charisma and was a more enjoyable flight than British Airways. Inflight entertainment was part of it. There's style and flair attached to Virgin which must stem from the European image."

Virgin has 14 so called "upper class" seats in the upstairs cabin along with a lounge and stand-up har. There's live entertainment throughout the plane. The fare is less than half that of first class and slightly less than Business style

is one of cautious pioneering

business class on other airlines. Right now, for example, the "upper class" round-trip fare from London to New York is £998, compared with £2,058 in first class and £1,024 in business class on British Airways. Passengers in "upper class" get free helicop-ter service at Newark and a free economy ticket (which they can use any time) handed to them on boarding the plane. "It's a direct bribe," Branson says.

Virgin's economy class is one of the cheap-est ways to fly the Atlantic. It is an unrestricted ticket. Round-trip is £378 on week-ends and £358 weekdays, compared with £758 on BA. This is even cheaper that BA's midweek APEX fare of £384, which is hedged with restrictions. In winter, Virgin has what it calls a "space class" fare, up front of the main cabin. This is slightly more expensive than economy, but guarantees an

empty seat next to you.

Many of the major airlines have gone into the hotel business. Virgin has The Island, a groovy alternative to the "total travel pack-

ages" offered by its competitors.

The Island (Neckar is its proper name on the map) is the most northerly and remote of the 50 or so British Virgin Islands. It is 35 minutes by speedboat from the airport on Beef Island, which is connected to the main island and capital, Tortola, by a causeway. The nearest international gateway is San Juan, Puerto Rico (35 minutes by island airlines) to which there are direct flights by Lufthansa (Frankfurt), Iberia (Madrid) and Eastern (New York and Miami).

Branson bought The Island (uninhabited except for goats, the odd rock musician and his staff) for \$300,000 seven years ago, he has since built a luxurious hilltop house in Balinese style with accomposition for up to 20 people. There are superb views of the four beaches and eight other islands. Branson originally intended it as a vacation home, but as he has only spent a total of two weeks there, he decided to throw it open for others island for \$5,500 a day, all in, including food,

drink and recreation. If you need any more persuasian, Branson offers your party a free round-trip in the upper cabin of Virgin Atlantic. Unfortunately, he doesn't yet fly quite all the way. Although he admits, "The only reason we're doing Miami is because of The Island."

Branson affects mild annoyance that he can't take his family to The Island this Christmas because Robert de Niro has booked it. But he might just be kidding.

booked it. But he might just be kidding.

TRAVEL

Edinburgh: Relics of Independence

by Vivian Lewis

DINBURGH - Anywhere in Edinburgh, the castle looks down on you. With its Old Town, it is a brooding relic of the independent kingdom of Scotland, with princes and court, preachers and populace, all huddled together on the spiny, impregnable hilltop running from Edinburgh Castle to Holyrood Palace, the Royal Mile. The castle crased to be a seat of power after the defeat of Bonnie Prince Charlie, its defenses shattered when the Nor'Loch was drained in 1766.

With the loch filled, Edinburgh could exoand beyond the Auld Reckie, the original hilltop. A square mile of reclaimed land was developed by purest Georgian enlightened city planning, at the price of political power. The shopping area of Princes Street, the Mound on which the Royal Gallery stands (made of dredged earth), the stately squares and elegant crescents, the open vistas and lovely gardens of the 18th-century New Town, could only be built because Scotland was no longer an independent country, nor Edinburgh its capital. Even the names of streets show the Hanoverian hold: George, Frederick and Hanover streets, Charlotte Square, York Place.

A modern visitor to Edinburgh should walk from the Scott Memorial on Princes Street, part of the 19th-century process by which Scotland became the land of home-grown folklore, bagpipes and kilts. Venera-tion of the country's first major novelist marks the transition from Scotland the Brave to Scotland the Onte, Sir Walter Scott is commemorated by the largest monument on Princes Street — a sort of Victorian, Gothic-revival spaceship in which he is de-picted sitting with a dog preparing for lift-

To reach the earliest building in the city takes a strong-legged climb to the castle from the New Town. It is a tiny white chapel from the New Town. It is a tiny wante chaper in the middle of a courtyard among the crenelated buildings and walls that owe more to Victorian imagination than medieval defense. The minuscule oratory of St. Margaret, a Scottish queen so unlike the others that she was canonized (her predecessor was Lady Macbeth) is a screne 12thcentury relic of the first queen to wear plaid and the first Scot to become exercised about the strict observance of the Sabbath.

In the Royal Chambers of the castle, the room where James VI (later James I of En-gland) was borne by Mary Smart, is one of the interesting sights. The bulk of the castle was so substantially restored a century ago that now some of it is considered to be of architectural merit as Victoriana. It houses a ceremonial hodgepodge of Scottish regimen-tal history. As at Carnaervon in Wales, costurned regimentalism has become a proxy for outlawed nationalism. There is another dog memorial, to a regimental mutt who survived the Charge of the Light Brigade but not

VERYTHING is downhill from here, so a good look over the neat squares of the New Town to the Firth of Forth should precede it. A first-sight walk down the Royal Mile is the stair-filled honse of Lady Stair, now a museum to Scottish writers like Robert Burns, Robert Louis Stevenson and the ubiquitous Sir Walter, commem-orated by many walking sticks. The 11th stair between the Robbie Burns floor and the Scott floor is higher than the others — so a housebreaker will stumble and be known.

Lady Stair's House is in a close, a typical

Edinburgh alley perpendicular to the Royal Mile. (A wynd is an alley open at the end.) In Edinburgh, the word "tenement" went from describing a form of property tenure to being a description of a crowded slum apartment building. A typical six-story walk-up, another Edinburgh invention, is Gladstone's Land, a series of six four-room apartments over an arcade and a shop on the ground floor, each inhabited by a whole family plus servant (who slept in a sort of Murphy bed in the kitchen.) Gladstone himself lived up two cockscrew flights of stairs so he could rent out the more desirable floor.

The surprises of 17th-century lifestyle is that it wasn't all that down and dreary. The large front room (bedroom for the parents plus sitting room) is decorated with magnifi-cent, original 17th-century painted beams, showing bright-colored flowers and fruit, more Scandinavian than Scottish in feeling. Life may have been dirty (there's a privy in the kitchen along with the tiny servant's bed) but it was pretty and colorful too. Even John Knox's Presbyterian interior

was brightly decorated, again with a painted ceiling, showing the devil. There's also a wall painting of what is said to be Adam and Eve — complete with a mystery third party. Knox's 15th-century house is further down the Royal Mile, close to the Nethergate Port (now an arts center) through which the Jacobites entered the city in 1745.

The preacher's greatest target lived right on the bottom of the street, in Holyrood

Palace, Mary Queen of Scots, who was about as unlike Queen Margaret as can be, lived in the older wing which, at least as restored by her great-grandson, Charles II, has a surprising similarity to a Loire château. Charles also installed the picture gallery of Scottish monarchs, 111 kings, all of whom have the pendulous nose and rosebud mouth of Charles II himself.

Here in Holyrood there took place the conspiracy led by Mary's second husband to have her secretary dragged from her pres-ence and murdered. You can visit both the room where the queen and Riccio were found, and the room below, with Lord Darnley's great bed, through which the murilerers had come, and you can speculate on the motives for the murder which led to such a long train of murders.

Mary Stuart memorabilia in the palace includes two needlework plaques she em-

Edinburgh, with Princes Street at the right.

broidered. One shows a red-haired cat toying with a little gray mouse, teasing it but not putting it out of its terror. Done during Mary's captivity in England, it may be an allegory of her own treatment at the hands of red-headed Elizabeth I. There is also a spectacular, rained 11th-12th century abbey

Before leaving the palace precincts, you might look in at the oldest continuously operated pub in the city, Jenny Ha, at Golfer's Land. The building is new but the busi-ness is an old one. The original landlord of the site was a shoemaker named John Peterson who built the close with money he won partner of the Duke of York (later James VII and II) at golf. Calton Road (where the weaver met Nancy Whiskey in the song) and Fish Street will take you to the New Town without climbing the hill.

PRINCES PARK is full of benches donated by Scots abroad, among them ones from an American colonel, who set them up in honor of all his wives. Charlotte Square, the heart of Georgian Edinburgh, is now the financial district. At No. 7 on the north side of the traffic-filled square, the Scottish National Trust's Georgian house is the perfect counterpoint for the 17th-century residences of the Mile. With two spacious floors on view, its gracious living contrasts with Gladstone's Land. But even here there is still a touch of Scottish economy: The exterior stone is unpainted and gray, the stair uncarpeted, the silver in fact Sheffield plate.

Except during the festival, when they open Sunday afternoons, Edinburgh museums still observe St. Margaret's sabbatarianism. All are open weekdays from 10 A.M. to 5 P.M. Admission to the castle is the most expensive, at £2 (about \$2.80); at all the other sites you will get change from a pound

Edinburgh is a walker's town but if you cannot manage the hill, a taxi from Scott to the top will cost £1.

Edinburgh food is simple and reliable, but rarely memorable. At the castle end of the Mile, Cinq (in a wynd off Boswell's Court) has both pub food and an upstairs restaurant. Salad and sandwich bars on the Mile have a health-food slant and a hippy air. In the New Town, Terrace Restaurant on Rose Street has a help-yourself salad bar and offers a choice of three roasts in the Carvery (about £10). If you must have a haggis, a traditional Scottish kitchen is The Laird's Corner, 26 Victoria Street; it also offers carry-out haggis (not tested by the writer).

Along the Royal Mile are several shops selling Shetland-type knits in unconventional styles, like 158 and 166 Canongate; prices are very reasonable for the flair and hand-

Plaids and tweeds are sold throughout the city, and prices vary enormously. A woman's Harris tweed suit can cost from £95 up, a acket from £45. It is worth comparison shopping, just as the Scots do themselves. Most shops will promise to reimburse the British value-added tax on exports.

For men, there is an alternative to the unwearable plaid tie: a decorated tie in more discreet pattern of the clan's crested pin. At Celtic Craft Center, Paisley Close (95-101 High Street), they will help you find your crest, and charge £5.50 (in polyester).

The Aberdeen whisky merchants William Catenhead have opened a branch at 172 Canongate (Royal Mile) selling 100 different single-malt unblended whiskies from 12 years old to older. Speyside doesn't taste like Campbeltown, and the experts can distinguish Islay from Highland malts. Alas, the shop is not allowed to offer you tastes. Whiskies cost about £10 and up, and you can ship a case of 18 bottles out excise-free (although you will have to pay duty on arrival in most countries).

The Mile boasts antique shops specializ-ing in maps, playing cards and Scottish kitsch, half a dozen art galleries and the purveyor of fudge to Princess Anne (too eet even for the Fanny Farmer taste of our family princess).

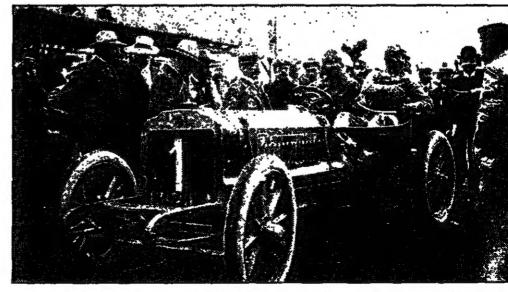

Vivian Lewis is a Paris-based journalist.

Herald Tribune.

The International Herald Tribune invites you to attend the 80th Anniversary of the

ORDON BENNET TOMOBILE CUP

Sunday, July 21, in the Auvergne countryside near Clermont-Ferrand, France.

In 1900, James Gordon Bennett, Jr., founder of the International Herald Tribune, created the first International Automobile Cup. The winner averaged 38.4 mph (61.9 kph) — despite a collision with a large Saint Bernard.

On Sunday, July 21, 1985, sixty cars built between 1903 and 1945 will participate in a Gordon Bennett Memorial Rally commemorating the 80th anniversary of the last Gordon Bennett Automobile Cub. held in 1905 in the Auvergne countryside near Clermont-Ferrand, France.

Participating cars from seven countries will drive the same 137 km route designated by the Michelin brothers for the 1905 race. Departure will be at 8 a.m.

from the Plaine de Laschamp, 14 km west of Clermont-Ferrand, on route 941A.

Regularity trials will start at 3 p.m. at the Circuit de Charade, a 4 km mountain racecourse just west of Clermont-Ferrand where several French Grand Prix have been held.

An exhibition on the 1905 Gordon Bennett Race will be open from July 15 to 25 at the Maison des Congrès in Clermont-Ferrand.

All events are organized by the Automobile Club d'Auvergne and will be free to the public. For additional information contact the International Herald Tribune in Paris, tel. 747 12 65,

Noteworthy Participants in the 1985 Gordon Bennett Memorial Rally

1903 de Dion-Bouton -- Participant in the 1903 Paris-Modrid race. 1907 Fiat Mephistopheles — Set a world speed record in 1924: 146 mph (234.9 kph). 1908 Hutton — Winner of the Tourist Trophy in England in 1908. 1932 Peugeot 301 — Set a 24-hour speed record in 1932. 1932 Alfa Romeo LL 33-Winner at Le Mans in 1932.

Dance in France

prise the composer's "Holidays" Symphony, the separate movements of which refer to holidays, including Independence Day. Yet Ives was not James's contemporary. Moreover, James exiled himself in London and his view of American innocence does not square with Ives' sophisticated populism — the view of a man very much at home in America.

James's sense of place in "Washington Square" is not that of Ives's ironic picnic grounds. True, James's New York society, with pretensions to gentility, may have been rooted in a crude money-making culture. Morris Townsend, Catherine Sloper's suitor, SAME TO THE PARTY OF THE PARTY is interested only in money. But the story is an intimate one and it could have a made a betfeet ballet for Antony Tudor, as Nureyev has sensed in the interior scenes. In fact, the four characters' conflicting feelings are best rendered in a Tudor-like passage, set to Ives's "Unanswered Question."

Nevertheless, the overall effective the passage is to interest the overall effective the passage.

static theater. Nureyev had a literary collaborator for the scenario, Jean-Claude Car-nère, and Antoni Taulé, a Spanish painter, is OPPERATOR OF THE PERSONS responsible for the overly grandiose facades one of which opens up to show the town-house interior. Nicholas Georgiadis's sepia costumes for the social-comment scenes successfully move away from realism although the grotesque masks for the black characters are indefensible. There are good touches. When the marching band bursts onstage, Nureyev's choreography is vividly alive. A word also for Monique Loudières as the heroine and Ghislaine Thesmar as her aunt.

The same program featured the 20-year-old Sylvie Guillem, recently promoted to the park of étoile, displaying her hyper-extended, extreme developpés in Kenneth MacMil-

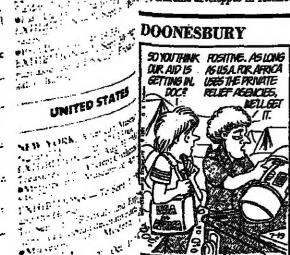

lan's "Song of the Earth" and in Maurice Béjart's new duet, "Movement-Rythme-Etude," Eric Vu-An, an intense and polished dancer, partnered her in this post-Robbins encounter between two dancers who meet and part. A sensation since she won the top prize in the 1983 Varna competition, Guillem has only to step on a stage to take it over. Loose-hipped within a natural flow, her dancing has a cool presence, mysterious in

Continued from page 5

the way Allegra Kent's was. EANWHILE, two Lifar revivals proved more than curious. The Bal-let Théâtre Français de Nancy presented Sylviane Bayard (a guest) and Patrick Armand in "Aubade," the 1946 ballet to Poulenc's score, in which Diana very visibly turns Acteon into a deer. If most of the choreography seemed conventional, there

were twists and archaic images that were not. How much of Lifar's choreography was actually performed by Phsetskaya (now also director of the Rome Opera Ballet) in "Phèdre," to Georges Auric's music, is de-batable. Nearing 60, she still stands firmly on toe and retains her grandiloquent pres-ence. The ballet is worth seeing for Cocteau's concept. Each dramatic episode is intro-duced by a tableau vivant within a small theater onstage. The curtains are drawn, for instance, to reveal Hippolytus against black and white horses photographed by Brassai. Hippolytus, by the way, wears a chartreuse wig to match his leotard, just as the character, Oenone, is topped in lavender to match her costume. The male ensemble, in apricot, jogs around with flexed biceps. Like all Cocteau ballets, this one is fascinating.

© 1985 The New York Times

Volcker Weighs the Risks

The Federal Reserve Board is now following and that is where the inflationary dangers a course that carries substantial risks. At a time when a gigantic borrowing boom is under way in America, the Fed has decided to tolerate the recent rapid expansion of the money supply. As it argues in its midyear review this week, any other decision would be far riskier.

The Federal Reserve's intentions carry extraordinary weight currently, for it is the only moving part in the machinery that steers national economic policy. The Reagan administration, having created a gigantic budget defi-cit, is showing no great inclination to do much about it. Congress is struggling to bring the deficit under control, but the prospects for progress are not dramatic. Only the Fed continues to exert direct influence on the economy from week to week, as it pushes money into the banking system or pulls it out - with interest

rates falling or rising in response.

Normally, when a borrowing boom gets under way, the Federal Reserve has a clear duty to restrain the money supply. A surge in borrowing generally comes late in the business cycle after a period of strong growth, when the economy is starting to overheat and signs of rising inflation appear. But that is not happen-ing this year. One of the peculiarities of the Reagan administration's economic strategy is that it has inadvertently unlinked supply from demand in America. Previously, when demand rose rapidly, industrial production kept pace,

became visible. But now, when demand rises, an increasing share of it is met by production in other countries. Inflation stays relatively low - and unemployment stays high.

Paul Voicker, the chairman of the Federal Reserve Board, made that point to a congressional committee this week. Demand has been rising at the brisk annual rate of more than 4 percent so far this year, but the output of goods and services has been rising at only 1.5 percent or less. The difference between the two figures lies in the rising American trade deficit. It is being financed with borrowed money.

While some parts of the economy are prospering mightily, others — those that must compete with the imports — are under great pressure, with low profits and low production. In these circumstances the Fed fears, with

reason, that any sudden tightening of the mon-ey supply would produce a sharp recession. The Fed would clearly like to see Congress reduce the budget deficit. It would like to see the dollar's exchange rate continue to come down and the trade deficit narrow. But as long as the dollar stays high, industrial production stays sluggish and inflation stays low, Mr. Voicker says that the Fed is not inclined to restrain money severely despite the borrowing boom. It is taking chances but, as Mr. Volcker argues, it has no acceptable alternative.

- THE WASHINGTON POST.

After a Brush With Cancer

So dread is the very thought of cancer that many people were no doubt stunned and saddened at the first word that cancer had been found in the intestinal tumor removed from President Reagan on Saturday. Yet his doctors immediately went on to report that all of the malignancy had been removed and that Mr. Reagan has an excellent chance to recover quickly and completely, to return to his former level of activity and to live a good and long life.

All of us surely wish that that will be so.
In speaking of Mr. Reagan's medical prospects, the doctors referred to percentages:
They said, for instance, that there is "greater than a 50-percent chance" of a complete cure. On the calculator that each of us carries in his head, that can produce the doleful conclusion that the president has as much as a 50-percent chance of more sickness. But that sort of calculation leaves out the consideration that Mr. Reagan is already at an age where he is, at least theoretically, vulnerable to assorted illnesses. Perhaps the correct conclusion is that he is in his 70s but is also basically healthy. Those are the two things that the American people knew about his physical condition

when they re-elected him less than a year ago. In this respect, not much has changed. What we know about Mr. Reagan's cancer

comes chiefly from the accounts given by his doctors in the last few days. They are medical men, but the implications of their analyses are profoundly political in the way they affect public confidence. Once again, it appears, the president has been well served in his choice of doctors. We speak not so much of their medical skills, which it is for others to judge, as of the evident clarity and candor they have displayed in their appearances before journalists. At a time when a 74-year-old president has had a brush with cancer, nothing is more useful and necessary than the public's conviction that the doctors are competent and intend to prac-tice a vigilant watch on their patient, and also that they are telling the public everything that is on the public's mind to ask. Ronald Reagan has been beating the odds

and prevailing over 50-percent chances for as long as we can remember. It is a distinguishing mark of the man, and we are confident that this case will be no different.

- THE WASHINGTON POST.

First the assassin's bullets, then the shadow of cancer. President Reagan has defied both grim threats with good fortune and remarkable serenity. No major operation on an elderly patient can be assumed free of risk, but Mr. Reagan seems to be recovering rapidly. There seems every reasonable likelihood that he has stepped clear of his brush with cancer and will continue his term in full health. That is excellent news for him and for the nation.

The Reagan White House this time avoided the confusion of authority in the hours after the 1981 assassination attempt. No secretary of state misleadingly proclaimed himself in charge, and there was no doubt about who held authority while Mr. Reagan lay helpless in surgery. The president transferred his powers to Vice President George Bash from the moment he underwent anesthesia, and he reclaimed them on recovery later on Saturday.

Despite the orderliness of the process under the 25th Amendment, the White House invoked it with curious reluctance. It delayed informing Mr. Bush that he was acting president until after the fact, and the president's strangely worded letter stressed that he was "not intending to set a precedent." Precedent

or not, the transfer procedure should become routine on similar occasions.

Mr. Reagan's doctors at the Bethesda Naval Medical Center merit praise for a successful operation and public accounting. But there are questions about the prior treatment. Why was the large polyp not discovered sooner? Why was the whole colon not examined after detection of the first small polyp, removed in May last year, or the second, removed last March? Some reassurance is needed that presidents an getting the best medical care, however pressing their duties or political agendas.

No illness is timely, but Mr. Reagan's could have come at much worse moments. His recov-ery will no doubt interfere with his plans to lead Congress toward a major deficit reduction and tax reform. But he had already scheduled a three-week vacation in August at his ranch. He should be well recovered to keep his date with Mikhail Gorbachev, in November. Just a few hours after coming round from his colon operation, Mr. Reagan seized back with alacrity the powers he had transferred to Mr. Bush. His zest for life and office is the best possible

sign that he will successfully fulfill both. - THE NEW YORK TIMES.

Other Opinion

Reagan Has Work Yet to Do

The presidency of the United States is not like the leadership of the Soviet Union. There is no chugging bureaucracy which can render a sickly chieftain mul and void for months on end. There is a constant need not only to keep abreast of events but to be endlessly seen on television as commanding those events. Mr. Reagan, moreover, has a diary chock full of challenges. He hasn't got a budget yet. His tax reform crusade has barely begun and will get nowhere without his personal commitment. Mr. Gorbachev awaits him in November. Be-

yond that the midterm elections move ever closer. He cannot afford to be out of the firing line for more than a few weeks. If he doesn't seem to be fully in charge and fully active by the middle of September, we may begin to witness a rapid draining away of authority.

Ronald Reagan, with more than three years left as leader of the Western world, could then become a neglected ceremonial figure, while beneath him the challengers for power next time, and those who serve them on the White House staff, will begin to scrabble for the authority that has left the Oval Office.

- The Guardian (Landon).

FROM OUR JULY 19 PAGES, 75 AND 50 YEARS AGO

1910: Aeroplanes to Replace Autos? PARIS - Counte Jacques de Lesseps, the French aviator, is convinced that the aeroplane has commercial value. "On the big farms of the West," he said to a Herald correspondent, "a man with a Blériot, rising and descending anywhere, would be able to cover all his property in a short time." The remark reminds one of the practical results achieved by the aeroplane, and calls up a vision of a time when farmers may make the daily round of great farms in aeroplanes. It also makes one wonder whether another period of abandonment may not be awaiting the highways which fell asleep when the train vanquished the stage coach, and were recalled to life by the automobile. Comte de Lesseps believes aeroplanes

will soon be as common as automobiles.

E

1935: Selassie Calls Abyssinia to War ADDIS ABABA — Haile Selassie, Emperor of Abyssinia, made a stirring address to his peo-ple lon July 18], calling upon young and old to unite and if necessary to die "in a common resistance to the invader." Speaking before an assembly of the chiefs and notables of the land, he denounced Italy's ambitions. "For 40 years Italy has been nourishing a desire to conquer Ethiopia. After attacking the Ethiopian escort of the Anglo-Ethiopian boundary commission at Wal-Wal, on our territory, last December, she is now asking for reparation. If no peaceful solution is found, Ethiopia will place her destinies in the hands of God. It is far better to die free than to live as slaves. We are poor, but we shall show the world how a people can die in defense of its sovereignty."

LONDON — "If the hungry could eat words, Africa would recover," observed a BBC commentator earlier this year. For all the words

spoken, written and sung, what have we learned?
Quite a bit, as a matter of fact. Not least, some myths have been shattered:

The myth that famine stalks the continent because of climatic changes. The truth is that we do not know if the climate in Africa is becoming the continuous stalks. drier. The majority of meteorologists would sub-scribe to the view of the Canadian climatologist Kenneth Hare, who wrote last year that the recent droughts are part of "a natural fluctua-tion." He added, however, that "it is not incon-ceivable — though still unlikely — that human interference may be prolonging and intensifying the dry spells natural to the climate." One thing

we can be sure of: Bad agricultural practices do not make good use of the rain that falls.

• The myth that Africa cannot feed itself. As recently as 1970, Africa was self-sufficient in food. Other continents, not least Asia, have good the continents and the second self-sufficient in food. through crises of food production and are now well out of them. While it is true that Africa as a whole has poorer soils than Asia and a water table that is much lower, which makes irrigation more difficult, there is still great room for im-

More Harm Than Good

THE Live Aid rock concert was an orgy of L pointless and misdirected emotionalism which is likely to have a harmful effect on the which is likely to have a narmful criect on the starving people of the African famine belt. It was dominated by the all too familiar posing and publicity seeking of the pop music industry, with ignorant and self-seeking figures posturing on the stage in a frenzy of childish demands upon the stage in a frenzy of childish demands upon

government to do what sane and competent governments know is not possible.

All of this has very little to do with the problem. If anything, it will do harm by encouraging the governments whose mistaken policies are largely responsible for the severity of the situation to do nothing to reform those policies. The concert will encourage people in the developed countries to believe that the problem is somehow the fault of their own governments and people, rather than the Africans. This is not true.

The harsh truth is that the disaster in the African famine belt is almost entirely the fault of the various governments concerned. Drought in

Africa is not unprecedented, and it is not impossible to prepare for it by storing food and seed. - This has been adapted from an editorial in the Australian Financial Review (Sydney).

By Jonathan Power

population growth. In some countries the rates of population growth are faster than anywhere else in the world, yet Africa as a whole is not overpopulated. The average population density is 16 per square kilometer, compared with 100 per square kilometer for China and 25 for India. In some parts of the continent the population is so thinly spread that it is difficult to organize activi-

The myth that pastoralists' overstocking has produced erasion and desertification. The distinguished anthropologist Mervyn Herskovits argued in 1926 that East African herders were locked into elaborate social and political systems that forced them to maximize the size of their hards ir respective of the damage to the environ-ment. Present evidence suggests that herds are not usually too large, that herding keeps many areas from regressing into unproductive bush and that grasslands can recover from overgrazing more quickly than is commonly supposed, as long as they are not on easily erodable hillsides. There is no convincing evidence of widespread desertification caused by pastoralism. Neverthe-less, there are, in times of drought, temporary spasms of overgrazing that wreak great havoc.

• The myth that most aid has been spent on

ogricultural development. After the 1968-1973 drought, donors and local governments pledged that their number-one goal for the Sahel was self-sufficiency in food production. Billions of dollars of aid poured in, But between 1975 and 1981, 35 transport, telecommunications, health care and water supply. Only 4 percent of the aid was used to grow rain-fed food crops and only 1.5 percent on tree planting or soil and water conservation.

 The myth that we really know what is going on. The statistics on Africa cannot be trusted. One example is not atypical: According to the Nigerian government, the 1980 production of cassava was 6.7 metric million tons. The UN Food and Agricultural Organization reported that it was 9.2 million tons. The U.S. Department of Agriculture put it at 14.8 million tons. Such discrepancies mean that no one knows if there is

The myth that we know what to do. The belief that scientific knowledge could double cutput if only there were the political will is not true. Little

provement. The rich soils of Chad alone, with the right techniques, could feed the entire Sahel.

• The myth that Africa is overwhelmed by population growth. In some countries the rates of

ty on a reasonable economic scale.

percent of the aid went on shipping in food from abroad. Another third went to infrastructure,

great success or awful failure.

food crop research has been done on staples.

Sweeping Away a Few More Myths About Africa What has been done has rarely been field tested in the local ecological and economic conditions.

AFRICA

EXTRAVAGANZA

These observations are partly prompted by Lloyd Timberlake's new book "Africa in Crisis," published by Earthscan. It is by far the best of the near flood of volumes that have appeared on the subject in the last few months.

Where do we all go next? The temptation is for

where do we an go next? I he temptation is for well-meaning advisers and helpers to rush in, but that is not the answer. According to a World Food Council report, Burkina Faso, for one, had visits from 340 aid missions in 1981. Harassed officials spent a great deal of their time meeting and seeing off the visitors.

Some 30,000 expatriates work for public agencies in Africa and more than half the \$7 billion

spent each year by donors goes on salaries. Dji-bril Diallo, a Senegalese UN official, has com-plained: "Africa's biggest problem is too many people going around the continent with solutions

before anyone else calls for some great Marshall Plan to save Africa, there should be a big pause for a big think — and only then some steady and careful steps forward. International Herald Tribune. All rights reserved.

The Poor Feed the Rich

B ECAUSE the poor are feeding the rich, fam-ine in many parts of the world will increase. Ironically, the conventional strategy of develop-ment agencies and many Third World governments — to encourage still greater exports — only makes matters worse. In the throes of its only makes matters worse. In the throes of its current misery, Africa offers a striking illustra-tion. Media accounts portray the continent's food problem as a blend of drought, disease, overpopulation, political instability and ineffi-cient peasant farming. The prevailing belief is that Africa is a basket case which will survive only through massive, open-ended aid. In fact it is a rich and steady source of crops consumed daily in the advanced nations — meat, vegetables, tea, coffee, cocoa, sugar — and even of fresh flowers for the dinner table.

Increased exports will benefit international agribusiness, which dominates Third World agricultural production, and will maintain the large landholders there, but it will not feed hungry Africans. The question "What can poor countrie do to become self-sufficient?" requires a small but critical change to "What can rich countries do to become self-sufficient?"

- Albert L. Huebner, an expert on hunger who teaches at Colifornia State University, writing in The Nation (New York).

That Bang

Resounds

To This Day

By Tom Wicker WASHINGTON - Fony years

V ago. "in the New Mexico de-sert, early on a Monday morning, 16 July 1945, the sun could be judged to rise twice." The "false dawn" was-

Trinity, the first nuclear explosion, as

recalled by Philip Morrison, a physi-

Less than a month later, on Aug. 6

and 9, apparently with little insight

into the terrible era of destructive

possibility and international insecuri-

ly being opened, America exploded

the first two atomic bombs over His roshima and Nagasaki. But by Aug. 17, 1945, four physicists instrumental

in Trinity - hence in Hiroshima and

Nagasaki - were looking into the ominous future in a letter to Henry L.

Stimson, the secretary of war. Far more effective atomic weap-

ons, against which there would be no practical defense, they wrote, would become available: and the develop-ment of such weapons "would appear

to be a most natural element in any

national policy of maintaining our military forces at great strength."

But A.H. Compton, Enrico Fermi.

Ernest Lawrence and J. Robert Op-

penheimer then added a prescient

warning: "Nevertheless, we have

grave doubts that this further devel-

opment can contribute essentially or

permanently to the prevention of

war. We believe that the safety of

this nation — as opposed to its ability to inflict damage on an enemy power -cannot be wholly or even primarily

cist who witnessed it.

in its scientific or technical prowess. It can be based only on making fu-

ture wars impossible." That letter is sadly recalled by Philip Morrison, now of the faculty at the Massachusetts Institute of Technology, in a review for the Union of Concerned Scientists of the 40 years since Trinity. The history of those four decades, he writes, is one of illusory attempts "to find a way to make more usable the power of nuclear weapons" — a history also proving technology to be "a double agent." For "what looks like a neat engineering advantage while it is onesided is all 100 soon seen as a worry-

ing challenge, once it has joined up with the other side as well.

Thus, after the U.S. atomic monopoly was ended on Aug. 29, 1949, by the first Soviet test explosion, President Truman ordered development of the "hydrogen or superbomb." And such a weapon was test-ed by the United States in November... 1952 — after rejection of a proposal Vannevar Bush to stop just short testing and to try instead for an reement to hait development as Mao did not hold Mr. Li's service long as no other nation conducted an under his rival, Zhang Guotao, against him. Mr. Li rose steadily in H-bomb test. But this second U.S. technological monopoly lasted no the Communist regime after 1949, longer than the first; the Russians The Cultural Revolution brought

tested their own H-bomb in late 1955. The story was reversed in 1957, when the Russians first fielded an intercontinental ballistic missile. The United States followed in 1958. himself. He was "set aside," and he thus escaped some turbulent out-breaks. He did not have to join the

But overall U.S. technological superiority produced photo-recon-naissance satellites and submarinelaunched missiles in 1960. Moscow caught up in satellite technology in 1962 and tested submarine-launched missiles in 1964. The United States acquired solid-fueled ICBMs in 1962, the Russians four years later.

said to me, "I consider myself very lucky." He had escaped purges, bul-lets and political dangers. He lived to ascend under Deng Kiaoping to the presidency. In his mid-70s, he is be-MIRVs — multiple warheads on a single missile — were conceived by U.S. planners to foil Soviet missib defenses by firing decoys as well as a real warhead. Missile defenses then were barred by the ABM treaty, and the Russians sought to bar MIRVs in SALT-1. But America developed MIRVs anyway - to carry not decoys but more warheads ner mis By 1975 Washington had deployed 550 Minutemen with three warkends apiece, and had MTRVed the Poscidon submarine-launched missile. As might have been expected, Moscow began MIRVing in 1977, and by 1980 Ronald Reagan was campaigning against the "window of vulnerability' through which he said MIRVed Soviet missiles could destroy U.S. land-based missiles. The Scowcroft

commission he later appointed wged a return to single-warhead missiles. So it has gone for 40 years, with every technological gain for either side being matched, sooner rather, than later, by the other, And Mr. Morrison sees that grim history appearing itself — in cruise missiles for example, which ultimately could threaten the United States across its long, vulnerable coastlines; in improved guidance technology, which makes both sides' missiles more soul-

tegic Defense Initiative. This latest "technological fix," is Mr. Morrison's view, will not work as a defense, but it will probably parduce an effective anti-satellite weap on. That will force the Russians, 55 always, to respond, and "provoke an end to the long regime of peaceable toleration of satellites" — which would mean also an end to arms control verification, and to the most effective means of carly warning

against miclear attack. The New York Times.

A Survivor of the Long March Reaches Washington of Mao's great rivals. Many officers lost their lives. Mr. Li escaped. By Harrison E. Salisbury

ALISBURY, Connecticut -D year or so ago, the 76-year-old president of China, Li Xiannian, chatting with me — we are about the same age — said: "You and I are on the way out, but I think we are all happy to postpone our meeting with the Lord Yangwang — that is, God, as you call him."

Mr. Li. who arrives in Washington on Monday for a state visit, has postponed his meeting with Lord Yang-wang with extraordinary success in a

the ferocious Moslem borsemen of the Ma family clan. They cut the plodding infantrymen of Li Xiannian's army to bits. On their fleet horses, the Ma troops could cover in one hour the distance it took Mr. LI's weary men a whole day to cover. Under orders from the Red Army command, Mr. Li tried to lead his

Thirty-eight years ago this month,

career filled with peril. No one look-ing at his full, dignified figure would imagine that the silver-haired gentleman was once a hard-muscled survivor of 100 desperate battles. This has lent a stubborn frankness to his diplomacy in the era of that other tough

survivor, Deng Xiaoping. Stubbornness, frankness and toughness are traits not uncommon among those who, some 50 years ago, made the Long March that ultimately established Mao Zedong as leader of the Chinese Communist revolution in 1949. To survive that march required muscle, iron will and determination.
Of those on the march, only 5,000

to 6,000 made it to the finish line no one more improbably than Li Xiannian. Every actuarial table, every law of averages, every common sense judgment would have predicted that he would have met the Lord Yangwang by 1936 or 1937. Nor were these the only odds that he would face in half a century of participation in Chinese politics.

Li Xiannian, born into a poor family in central Hubei province, joined the Red Army as a recruit and rose through the ranks to command the 30th Army of the Communist Fourth Front Army by 1936. In 1937 he was 29, an "elderly man" to the teen-agers who made up his command. He had already been fighting for a decade.

Mao and the remnants of the First

Front Army, under his direct control, had by now reached the relative sanctuary of northern Shaanxi. In 1936 the Fourth Army was on its way to join Mao when Mr. Li's 30th Army was diverted onto what was cuphemistically called "the western expedition." It proved the most disastrous in the history of the Red Army. Worn out by years of hard fighting. Li Xiannian's forces were sent north

across the Yellow River and encoun-

tered the deadly Nationalist cavalry.

One day Mr. Li and his tattered band heard a plane. They prepared a last stand. To their surprise, the plane glided to a landing on the desert and a leather-jacketed figure stepped out — Chen Yim, a member of the Polithers buro, sent out to locate them. Mr. Li's life was saved. He joined Mao in northern Shaanxi on Jan. 1, 1938. It was months before all of his strag-

troops westward, hoping to escape to remote Xinjiang province, then under

Li was down to his last 1,000 men. the Soviet Union's friendly influence. But the attacks went on. Thirty-eight years ago this month, Li Xiannian was down to his last 1,000 men. He had lost almost all his officers. Ma

> a cannon and blew him to bits, Mr. Li dispersed his men in small bands. He had no maps. He calculated his route with a compass and by observing the stars. He knew they were somewhere beyond the end of China's Great Wall on the Gobi Desert approaches to Xinjiang.

LETTERS TO THE EDITOR

The Odds Have Changed Regarding President Reagan's ill-

ness, I suggest that he give serious thought to resigning. Presumably he would not have run if it had been known that he had only around a 50percent chance of completing his term; and if he had run, fewer would have voted for him. Now, five months into his term, he faces the incalculable stress that anyone must feel when confronted with such odds for survival. Perhaps in the days of Wilson, Franklin Roosevelt or even Fisenhower Americans could live with a ly Die Welt (July I) that the SDI president in problematic health, but today's world of instant communication makes huge demands on the leader of the free world.

STEPHEN V. GALLUP.

Fears About 'Star Wars'

The aborted launch of the space shuttle Challenger on July 12 because of the mechanical failure of a small actuator should serve to bring the altruistic nuclear and "star wars" dreamers down to Earth. As wonder-

ful as technological developments may be, somewhere at some time a part fails - and so will the world, H. RICHARD SONIS. Brookline, Massachusetts,

U.S. Secretary of Defense Caspar

Weinberger writes, in "Why SDI will Help to Create a Safer World" (July 11), that the Strategic Defense Initiative "is aimed at exploring innovative ideas for effective, nonnuclear defenses against ballistic missales." Pro-fessor Edward Teller, another SDI hawk, has told the West German daicould involve nuclear explosions in

space. Talk about looney tunes! HELGA VOSS. Nuremberg, West Germany,

Une Lesson of a Tragedy

Your story on the Perry brothers' rise and fall ("A Tragic, Puzzling End to Harlem Success Story," July 8) was especially poignant in its sense of loss for the various parties involved. As one whose immediate family has experienced a brutal American ghetto slaying, I could identify with the sad-

ly familiar motives of all concerned. In recent years I have often swal-lowed hard over my Japanese co-workers' incredulity at the sight of U.S. urban decay and crime.

The Perrys' transplant to afflu-ence, although well-meaning, was too much too late against a curtain of too little for too long. Urban tension and increasing anger and fear are fostered by an outrageously impotent punitive system. Action for the reform of trial and sentencing systems would do far more than the best of isolated social programs. To mean well isn't enough. Everyone in the Perry case worked for justice, each in his own way, and therein lies the tragedy.

RONA ABBOTT. Tokyo,

ondon's high street styles that clash with Establishment British fashion, have emerged once again as the ideas pot of the eighties.

years overseas buyers have begun crowding into London once more and filling designers' order books. The government has been out in front with Margaret Thatcher's message to the clothing industry to get up and win. And politics has helped designer of the year Katharine Hamnett (T-shirt slogans like "Nuclear Free Zone" and "Education not missiles" have been splashed across the nation's chests) reach international

During the last four or five

Analysing the dramatic change in fortune, reminiscent of the Swinging Sixties, it appears designers are split into two camps - Them and Us, the way radical new fashion always starts. Currently, the Street fashion of the young is ahead by several lengths and has penetrated some establishment

status.

strongholds. This is a unisex movement, with men's wear equally affected. But many people still do not understand what Street fashion in all about.

Stalls at Kensington Market, Portobello Road and Camden Town fuelled the flame that was to burst into a fashion inferno. The eighties began to swing and youth seemed to be wearing fancy

In Paris, Jean-Paul Gaultier was doing the same thing, in an up-market way. Young England loved his stuff and keeper, Joseph in Street, bought it.

In the heart of Sloane Ranger country, Joseph's shop at 6 Sloane Street, SW1 has Betty Jackson, Jean Paul Gaultier, Katharine Hamnett, Body Map, Richmond and

Where Femininity rules a Street

by Moss Murray

eauchamp Place is a London street combining the sophistication of Chelsea, Knightsbridge and Belgravia with the modernity and savoir faire of the Sloane Rangers. It is a thoroughfare of boutiques, all occupying modest, one time Regency houses, brightly transformed below their iron railing balconies. As well as fashion salons there are other exclusive shops and half a dozen interesting restaurants. As you turn the corner up in San Francisco, married national flavour via France,

first of the salons that catches your eye belongs to someone who is almost the empress of Britain's younger generation of internationally known fashion designers - Caroline Charles. Her boutique is as inviting to enter as her clothes are easy to wear.

Twice a year American store buyers descend upon Beauchamp Place to buy up most of her collection. You can see her latest designs at Worldly Things on Madison Avenue and also at Sake and Lord & Taylor in New York as well as at stores in Washington, Houston and LA. Hertie, the German chain, can never buy enough of the Caroline Charles label. Visitors to London can see her collection at No. 9 with its perfection of cut and stitching, including a delightfully named Formula One dress with a startling black and white chequered front at around £200.

'Cross the road to Panton at No 48 and you are in a different world. It may be raining outside, but inside this boutique the sun shines constantly through a rainbow of brightest prints for dresses, pants, shirts and tops, all designed exclusively by American born Panton - real

Making Merry with Malts

Single malt whisky is experiencing a renaissance, not in competition with its blended cousins, but as an after dinner liqueur. When production of Johnnie Walker's 12 year old pure Highland malt whisky 'Cardhu' began is uncertain, but it was certainly before 1820. Since the introduction of the new Cardhu bottle in 1983, this single malt has seen sales

at international duty free outlets of a centenary pack containing a Cardhu bottle and two Cardhu crystal cut glasses, as well as a 'taste of Speyside and Scotland' hamper produced in co-operation with Baxters of Speyside.

As part of this year's centenary celebrations of the opening of the 'new' distillery a portrait of the distillery has been commissioned from the Scottish artist John Glover. Just 500 are being signed for distribution to the company's 200 world

Says managing director of John Walker, David Connell. "our malts will not compete with our other blends, but establish a separate market of their own."

increase by 228 per cent.

Further increases are expected following the introduction

Pay-As-You-Use Offices

7 Torld-Wide Business Centres founded by an Englishman, Alan L. Bain, now has luxurious suites of offices available in London to al businessmen at 110-111 Strand, close to the Savoy Hotel. With office rents soaring throughout the world and staff salaries rising to sometimes astronomic levels, many businesses - including some of the largest corporations - are discovering that it makes economic sense to move into fully furnished, serviced and equipped suites of offices at business

At the Strand offices of World-Wide (01-836 8918) their Full Facility Plan costs between £675 and £1,250 a month. The charge includes an equipped and furnished office, full-time receptionist, mail and telex services, 24 hour access, all cleaning and maintenance, phones, plus use of a typing pool and photocopying on a pay-as-vou-use basis.

The company gives businessmen their own exclusive phone number, plus a shared switchboard and a receptionist who will receive visitors and accept packages when the client is not there. Cost? £450 a quarter. Alternatively, for £85 a quarter. pre-paid, the organisation will forward company mail and provide a listing at the building's entrance. Office suites in the Strand can be rented for less than £15 an hour.

A survey by Maureen Lefort, manager of World-Wide's London business centre reveals that an office in central London with reception area, meeting room and kitchen requires a minimum of 500 sq fect of usable space and can cost more than £10,000 plus a landlord's demand for a 3 year agreement. Charges, she says, for a well furnished office at a more than half this sum with equally significant salary

The Creation of a Culture and Genetics of the Future

By ANDREW POLLACK

New York Times Service

AYWARD, California — In a sterilized room at the headquarters of Bio-Response Inc., glass vessels hang on racks, gently jiggling. The room is kept at human body temperature. Inside the vessels are thin, hollow plastic fibers, performing many of the same functions as capillaries. They circulate a mixture of nutrients and oxygen meant to

mulate blood. The mimicry of body conditions is no coincidence. Inside the glass vessels, Bio-Response is trying to grow human and other mammalian cells. "We have an intensive-care unit for cells," said Alfred Daniel, the company's president. Such cell cultures, as

FRIDAY, JULY 19, 1985

making the products of genet-ic engineering.

The biotechnology indus-try's workhorse has been Escherichia coli, a type of bacte-But scientists now find that it is not always capable of pro-

ducing what is required. So the search is on for alternatives. In genetic engineering, genes containing the blueprint for making a certain protein, such as insulin, are isolated from human or animal chromosomes and implanted in a host organism, which then starts producing the desired substance.

E. coli became the main host organism because it was the first species scientists learned to implant foreign genes into. The

bacteria multiply rapidly.

But E. coli bacteria have several shortcomings. The substances they produce remain inside them, rather than being secreted. To retrieve the desired product, therefore, the bacteria must be split apart, adding to the processing costs. In addition, E. coli produce apart, adding to the processing costs. In addition, E. coli produce certain toxins, which also must be separated from the desired product. And in some cases, such as the human growth hormone being tested by Genentech, the human body has had some problems accepting products made by E. coli.

Perhaps a more fundamental drawback is that E. coli, being simple creatures, are simply not capable of producing certain highly complex substances that an animal can make. It is not enough to merely assemble atoms in the correct sequence. Pro-

enough to merely assemble atoms in the correct sequence. Proteins must be folded in a certain way to be active. In some cases, sugars must be attached to the proteins to help them function properly in the body. Bacteria cannot add the sugars and sometimes do not fold correctly.

EAST, a leading alternative, can add the sugars, though not necessarily the exact ones a mammalian cell would add. Moreover, yeast can secrete the proteins it produces, making it easier to collect the finished product.

Chiron Corp. of Emeryville, Cantornia, hopes its hepatitis B vaccine will become the first yeast-produced genetically engineered product on the market. But others say yeast does not neered product on the market. But others say yeast does not always make enough of a desired product to make extraction feasible. Zymogenetics Inc., a Seattle company that started out specializing in yeast, is now diversifying because yeast has not lived up to its promise, Alan Upshall, a senior scientist, said.

Zymogenetics hopes to become a leader in the use of filamentous fungi, long used to produce industrial enzymes and antibiotics. But it was only two years and that scientists figured out how

ics. But it was only two years ago that scientists figured out how

to implant foreign genes into fungi.

Attention is also focusing on other bacteria. About 300 scientists gathered at Stanford University recently to discuss Bacillus subtilies, a soil-dwelling bacterium that also can secrete products. Some scientists believe, however, that the only way to produce se most complex human and animal proteins, with the proper folding and sugar coating, is to use genuine human

Genentech has chosen mammalian cells over E. coil for a potentially major product — tissue-type plasminogen activator, a (Continued on Page 17, Col. 8)

Chrysler Says Net **Fell 26%**

Company Cites Bigger Tax Bill

Compiled by Our Staff From Dispatches DETROIT — Chrysler Corp. re-ported on Thursday second-quar-ter net profit of \$596.4 million, or \$5.02 a share, down about 26 percent from \$802.9 million, or \$6.48 a

share, a year earlier.

But Chrysler's chairman, Lee A.
Iacocca, said the company had operating profit of \$852 million in the quarter, up 3 percent from a year earlier. The drop in the net income figure was attributed to a higher

Sales for the second quarter, however, were \$5.98 billion, up about 14 percent from the year-earlier \$5.25 billion, Chrysler said. For the first six months, Chrysler reported earnings of \$1.1 billion, or \$9.19 a share, down about 27 percent from \$1.5 billion, or \$12.12 a

share, during the like period last Net sales for six months totaled \$11.4 billion, up 12 percent from \$10.2 billion in the first six months

Mr. Iacocca also said the company has increased its five-year spending plan to \$11.5 billion from \$10.5 billion

"The ante just went up by a bil-lion dollars," Mr. Iacocca said.
"We think that's what we have to spend to stay competitive, keep Chrysler strong and protect the jobs of our employees."

Mr. Iacocca said Chrysler would invest more than \$160 million in its Sterling Heights, Michigan, assem-bly plant to accommodate produc-

May.
Chrysler also will invest more than \$200 million in two other Detroit-area plants — \$150 million at the Trenton Engine Plant and \$58. million at the Outer Drive Manufacturing Technical Center in De-The additional investment in the

Trenton plant will increase produc-tion capacity for four-cylinder en-gines, Mr. Iacocca said. (UPI, AP)

Baxter Predicts Savings on Merger

Outlines Plans For Health-Care Conglomerate

By Steven Greenhouse New York Times Service
CHICAGO — As health-care executives began to assess the problems — and opportunities — that might result from the merger announced Monday of Baxter Travenol Laboratories Inc. and American Hospital Supply Corp., Vernon R. Loucks, Baxter's chief executive, provid-

ed the first glimpse of some of his plans to mesh the two leaders in plans to mesh the two leaders in the hospital-supply industry.

He painted a picture of an industry giant that would realize considerable savings, perhaps as much as \$400 million annually, by combining complementary operations, and be able to pour more more into research and more money into research and

At the same time, however, he said that significant "synergies" between the companies would not start to take effect until 1987. and predicted that the first full year in which the companies would enjoy all the benefits of the merger would be 1990. The \$3.8-billion merger is not likely to take place at least until September because of possible antitrust problems, according to Baxter officials.

Until the efficiencies begin to take shape, Mr. Loucks said, there will be earnings dilution. Joel D. Liffmann, an analyst with Drexel Burnham Lambert Inc. estimated that the merged companies' earnings would be \$250 million next year, com-pared with combined earnings of \$266 million last year, which was an very poor year for the indus-

try.
While Mr. Loucks will be chief executive of the merged company, Baxter officials declined to say what role, if any, Karl D. Bays, American Hospital's chair-man, would play in the new company, except to say he has been offered an unspecified high-level position as well as one of the six seats that American Hospital's directors have been offered on Baxter's board, Mr. Bays did not return calls on the question.

The first order of business, Mr. Loucks said, would be to

Mr. Loucks said Baxter has about 50 percent of the intrave-nous market and American's McGaw division has about 15 percent. McGaw, which Mr. Loucks hinted might be sold, has almost \$250 million in sales an-

Larry N. Feinberg, an analyst with Dean Witter Reynolds Inc., suggested that pharmacentical companies, especially Warner-Lambert Co. and Eli Lilly & Co., might be interested in buying megat be interested in order than three fourths of intravenous solutions have some drugs added to them.

Mr. Feinberg also said American Hospital's blood-processing di-vision, with annual sales of about

But industry analysts also pre-

dicted that the merged company could face antitrust problems in other areas as well, including heart-lung equipment used dur-ing open heart surgery. Raul P. Esquivel, an analyst with F. Eberstadt & Co., said that American has about \$100 million a year in this business, or about 40 percent of the market, while Baxter has about 10 percent of the market. He predicted that the Baxter operation would be sold. As Baxter looks at operations

to be cut for antitrust reasons, it is also eveing businesses that can be pared or combined so the two

companies lit together.

Mr. Loucks said that American's and Baxter's distribution systems would be merged, that excess production capacity would be ended and American's international operations would (Confinmed on Page 13, Col. 6)

Monsanto, Searle To Merge Under \$2.7-Billion Pact

& Co., a pharmaceutical company, and Monsanto Co., a chemical company, announced Thursday that they had agreed to merge in a transaction valued at \$2.7 billion.

The companies, which had sus-pended stock trading earlier in the day pending the announcement, said in a joint statement that Searle and Monsanto had entered in a acquisition of Searle by Monsanto lowed "an unexpected and unsolicited contract from Monsanto exdefinitive written agreement for the

a financially strong, large enterprise with common strategic interests and a determination to see that the goals we have vigorously pur-sued for our company are achieved and exceeded," Donald Rumsfeld, Searle's chairman and chief executive officer, said in the statement.

R. J. Mahoney, Monsanio's pres-ident and chief executive officer, said his company was "extremely pleased to be joining forces with such an established and respected

The agreement provides that St. Louis-based Monsanto will make a cash tender offer as quickly as pos-sible for all shares outstanding of Searle's common stock at \$65 a share as a first step in the acquisi-

The tender offer is not contin-The tender offer is not contingent upon any minimum number of shares being tendered.

Searle's stock rose \$4.12½ Thursday on the New York Stock Exchange to close at \$63.87½. Monsanto fell \$1.62½ to close at \$51.

Searle is a research-based company that develops, manufactures and markets throughout the world prescription pharmaceuticals, con-

sumer pharmaceuticals and lowcalorie sweetener products.

It makes and markets the artificial sweetener aspartame under the trademark NutraSweet

Monsanto is one of the world's leading producers of herbicide and is a worldwide supplier of electronic-grade silicon. The company also makes AstroTurf, an artificial surface ward to make a first an artificial surface ward to make first an artificial surface ward to make a first and to make a fir face used on sports fields.

Searle last year began exploring the possible sale of the company, or

The Associated Press parts of the company, in considering methods for diversifying the ment said.

Monsanto was reported in February to have made a \$1.3-billion bid for Searle's pharmaceutical di-

The exploratory effort ended last March, when Searle's board announced the company would con-

tinue as an independent entity. Thursday's announcement fol-

"Searle will now join forces with financially strong, large enter-ies with common strategic inter-it said Searle's board of directors had "unanimously concluded that this transaction is in the best interests of Searle's shareholders, employees and customers and business partners, and will recommend that Searle's shareholders tender their shares."

Dollar Rebounds In New York

United Press Internat NEW YORK — The dollar rebounded Thursday in New York despite the Commerce Department's report that the U.S. economy grew at a weak 1.7-percent annual rate in the second quarter.

One dealer, noting that the GNP figure had apparently been leaked Wednesday, said the GNP could have been accounted for in the previous day's decline. Testimony on the U.S. trade deficit by Paul A. Volcker, the Federal Reserve chairman, before Congress also was considered to have soft-ened the dollar's fall, several dealers said.

In trading in New York, the pound ended at \$1.402, down from Wednesday's \$1.4125. The dollar ended up, at 2.882 Deut-sche marks, from 2.84; at 8.755 French francs, from 8.61, and at 2.385 Swiss francs, from 2.333.

Major Banks Sell, Swap Some of Latin Debts

By Nicholas D. Kristof New York Times Service

NEW YORK — Some major U.S. banks are finding partial relief for their mountain of Latin American debt in a multibillion-dollar or their mountain that makes it secondary market that makes it easy for them to swap the loans or sell them outright.

The market has emerged quietly.

In it, an investor can, for instance, buy a Nicaragnan loan for about 10 cents for each dollar of face value or a Mexican loan for about 85 Third World debt, it offers banks a way to spread their risks or rid themselves of a troubled loan.

"If the market grows and succeeds, it tells bankers that they don't have to live with their mistakes," said Giacomo De Filippis, president of Giadefi Inc., a loan brokerage firm in New York that says it handled \$450 million in debt sales last year. "It gives a bank the lexibility to adjust its portfolio. The World Bank has gone so far

as to say that the secondary market could widen the range of lenders and thus increase the stability of the global financial system.

Most of the transactions are

swaps, but some are done for cash by corporations that have a business connection to a particular

Olympia & York Cancels Purchase Of Gulf Canada

SAN FRANCISCO -Olympia & York Resources of

Toronto has pulled out of an agreement to purchase 60 per-cent of Gulf Canada Ltd. from Chevron Corp. for \$2.2 billion,

Chevron amounted.

The sale of Gulf Canada was announced May 23, and Chevron gave the Toronto company three deadline extensions on the agreement while Olympia & York studied tax and legal con-

Chevron, which purchased Gulf Corp. in March 1984, could improve its \$14.1-billion debt burden with the sale of the Canadian assets, analysts said. Chevron will keep about \$18 million Olympia & York had on deposit, but will lose its chance to sell a major asset at what was considered an attractive price. Chevron offered no explana-

tion Wednesday for the pullout and Olympia & York executives were not available for com-

country, by risk-loving investors, and even by the debtors themselves who buy back their loans at a dis-

Banks engage in swaps to reduce their exposure in certain countries or to concentrate exposure in a few countries, according to Richard S. Weinert, managing director of Les-

For example, some U.S. banks have been swapping their East Eu-ropean debt to European banks in cents on the dollar. Although the market's volume is relatively small in relation to the total amount of Third World debt is offen banks. exchange for Latin debt. British,

Sometimes the debtors buy their own debt at a discount, relieving them of the responsibility to pay it back at full value. Private Latin companies have done this. Reportedly some countries, making the purchase through one of their public agencies, have used the market to acquire some of their own debt, saving them money and relieving the lender of a problem loan.

Multinational corporations also are buyers, though not for invest-ment reasons. Particularly in the case of Brazil or Chile, companies often buy debt as a way to operate in those countries.

m those countries.

If a corporation wanted to build a \$16-million plant in Brasilia, it could buy \$10 million worth of Brazilian debt from a bank for \$8 million and then trade that debt to the central bank of Brazil in exchange for the local currency needed to build the plant. The company would also get the rights of repatri-ation of profits that go with foreign Banks in the United States rou-

tinely sell portions of their portfolios of mortgages and government-guaranteed small business loans. But until investment bankers and specialists began to point out the opportunities to reduce exposure to Third World debt, the banks had tended to retain their loans to sovercign countries.

Ironically, the big New York City banks, which have the largest exposure to Latin American debtors, are loath to spread the word. Several refused to discuss the secondary trading of Latin loans.
One reason for the reticence, say

other bankers and brokers, is that the transactions provide tangible evidence that many Third World loans are not worth their face value and the big banks fear that regula-tors would cate that as a reason to require larger loan-loss reserves. Also, attracting attention to the discounting of the loans might make it more difficult to get other banks to participate in new loans to help pay off the old debts.

The big money center banks are

(Continued on Page 13, Col 7)

For the man with exceptional goals, a new dimension in private banking.

What makes TDB exceptional?
To start with, there is our traditional policy of concentrating on things we do unusually well. For example, foreign exchange, precious metals - and, very importantly, private banking.

Today, as part of American Express Bank Ltd., we offer you private banking with a totally new dimension. This includes access to the broad range of asset management services and global investment opportunities provided by the American Express family of companies. And for certain clients,

we also offer such valuable "extras" as Gold Card® privileges and the exclusive Premier Services,544 for round-the-clock personal and travel assistance. While we move with the times,

our traditional policies do not change. At the heart of our business is the maintenance of a strong and diversified deposit base. Our portfolio of assets is also well-diversified, and it is a point of principle with us to keep a conservative ratio of capital to deposits and a high degree of liquidity - sensible strategies in these uncertain times.

If TDB sounds like the sort of bank that meets your requirements, visit us on your next trip to Switzerland. Or telephone: in Geneva, 022/37 21 11, in Chiasso, 091/44 19 91.

TDB offices in Genera. London, Paris, Luxembourg, Chiasso, Monte Carlo, Nussau, Zurich. Buenos Aires, São

TDB, the 6th largest commercial bank in Switzerland, is a member of the American Express Company, which has assets of US\$ 64.5 billion and shareholders' equity of US\$ 4.8 billion.

Trade Development Bank

CHRYSLER AT \$

As contrarians, CGR has been pre-conditioned to resist the "Crowd", to foray as loners, to exhibit fiscal courage, based upon common sense "dogma". Courage, on the "Street", is a rare commodity. When our pundits recommended CHRYSLER at \$7, FORD around \$17, G.M. at \$38, critics assumed we were hallucinating.

One prestigious investment banker dubbed; "CHRYSLER as a logical bet, for bankruptcy; another STUDEBAKER PACKARO", Courage is more than the opposite of despair. Camus, Kierkegaard and Nietzsche, have proclaimed, in the subtleties of their semantics, that courage is not the absence of despair, it is, rather, the capacity to move ahead in soite of despair.

their semantics, that courage is not the absence of despair, it is, rather, the capacity to move ahead in spite of despair.

People attain dignity by the multitude of decisions they make from day to day. These decisions require courage. This is why Paul Tillich speaks of courage as "ontological", it is essential to our being.

Were our analysts mutually eccentric or courageous, in having predicted, when the DOW was under 800, that the "DJI"S" will touch 1,000 before hitting 750?" At the time most oracles were bearish, even BARRON'S, succumbed; witing, on August 9, 1982, that the "market seems to be saying it has seen the future and it doesn't work." A week later, the Bull rampaged; our optimism was vindicated.

When the DJI'S drooped under 1100, in the summer of 1984, the "Street" cringed; investors shovelled out tons of dreams. We refuted their manic-depressive nature, stating... "BUY, THE MARKET IS ABOUT TO ERUPT, VAPORIZING PROPHETS OF DOOM." And now? THE DJI'S WILL PASS 2,000, WITH COROLLARY GAINS IN EMERGING SHARES.

Our forthcoming letter focuses upon equities that can cataput; with minimal risk, emulating a recently recommended, "special situation," that spiralled 800% in 8

Stocks Lower in Profit-Taking Oiv. Yld. PE 100s High Law Quet. Chige

NEW YORK — Concern about economic M-1 Up \$200 Million weakness and the course of interest rates in the United States took the steam out of prices
Thursday on the New York Stock Exchange.
After two consecutive days of record-breaking
advances, investors took profits,
Stocks opened lower on news that the gross

national product grew at only a 1.7-percent annual rate in the second quarter. Nervousness about the lack of accord between the House and Senate budget committees also took a toll, ana-

Though stocks moved briefly higher in mid-afternoon activity, the market gave up ground again in the last hour of trading, closing near its

The Dow Jones industrial average lost 7.05 to 1,350.92. Trading was heavy.

Declines outnumbered advances by a 5-2 ratio. Volume totaled 131.4 million shares, down from 159.9 million Wednesday.

Some analysts said the market's relatively moderate decline on the GNP news after two

record-breaking days was encouraging, "The market action was very orderly and that is pesitive," said Marvin Katz of Sanford C. Bernstein. The market gained 22 points in the

of that Thursday, he noted.

Mr. Katz said the stage was set for stronger growth in the third quarter and that the increased economic activity would occur "without inflation commic activity would occur "without inflation commic activity would occur "without inflation." inflation rearing its ugly head."

Phillips Petroleum was the most active NYSE-listed issue, up 14 to 11%.

The Associated Press NEW YORK — M-1, the narrowest measure of the U.S. money supply, edged up \$200 million in early July, the Federal Reserve Board reported Thursday.

The Fed said M-1, which includes cash, the class accounts and probable translates.

The Fed said M-1, which includes cash, checking accounts and nonbank traveler's checks, rose to a seasonally adjusted average of \$596.2 billion in the week ended July 8, from \$596 billion the previous week.

For the latest 13 weeks, M-1 averaged \$584.5 billion, a 10.9-percent seasonally adjusted annual rate of gain from the previous 13 weeks.

The Fed has said it would like to see M-1 grow 3 to 8 percent from the second quarter through the fourth quarter.

Bankamerica Corp. was second, easing % to 17% after reporting huge second-quarter losses

G.D. Searle was third and the session's big-gest winner, up 4% to 63% on news Monsanto will acquire it for \$2.7 billion in cash. Monsanto fell 1% to 51. UpJohn advanced 2 to 118% while Squibb dropped 1% to 68%.
LTV Corp. rose ¼ to 8¼, while U.S. Steel closed unchanged at 27%, Both stocks were heavily traded.

BUSINESS ROUNDUP

Coca-Cola Profit Increased 6% in 2d Quarter ATTANTA — Coca-Cola Co. said Thursday that profit in the second quarter rose 6 percent on a 5.8-percent gain in revenue from the same period last year.

Net income for the quarter ended June 30 totaled \$196.1 million, or \$1.50 a share, compared with \$185 million, or \$1.40 a share, in the same period last year. Revenue rose \$1.50 a share, compared with \$185 million, or \$1.40 a share, in the same period last year. Revenue and carnings a said the company announced last year, for the first six months of the trust six months of the t

strong volume and earnings," said Roberto C. Goizueta, chairman and chief executive officer.

creased 12 percent in the second quarter and 11 percent in the first six months, the company said.

Goldsmith Raises

Zellerbach Stake Corp. to about 45 percent of its mained solid.

Interviewed by telephone in London, the financier said he might call a special shareholders' ng to try to balt a "scandalous proposal" by management to re-structure the paper and forest

According to Crown's bylaws, shareholders owning at least 40 percent of the company can call a special meeting of stockholders.

COMPANY NOTES

Apple Reports Loss, Sales Drop In 3d Quarter

CUPERTINO, California Apple Computer Inc. reported on Thursday a net loss for its third quarter and a drop in sales.

The company reported a net loss for the third quarter of \$17.2 milfion, or 28 cents a share, compared with net income of \$18.3 million, or 30 cents a share, in the third quarter of the previous year.
Sales were \$374.9 million; down 12.6 percent from \$422.1 million in

the same period last year, and down \$60.4 million from the second quarter. The Associated Press San Francisco In a week attributed the loss to one-time exof heavy trading. Sir James Gold-smith said Thursday he had boost-reorganization of the company. He ed his stake in Crown Zellerbach said Apple's financial position rereorganization of the company. He said Apple's financial position re-

"While it is difficult to predict how long the pause in the computer industry will last, we are confident that Apple is well positioned to take advantage of future growth,"

For the first three quarters, Apple reported sales of \$1.5 billion, a 45.6-percent increase from \$1.03 billion in the comparable period in 1984, and net income of \$38.9 million, up 17 percent from \$33.2 mil-

Lourho Reports 33% Profit Rise In First Half

LONDON — Lonrho PLC teported Thursday that pretax profit for the first half rose 33 percent to £70.7 million (\$100 million) from £53 million in the first half of 1984.

Revenue rose to £1.28 billion. an 11.3-percent increase from £1.15 billion.

A £47.4-million extraordigary profit in the first half reflected the sale of Lourho's stake of almost 30 percent in House of Fraser PLC late last year, a spokesman said.

Lourho said overseas mining ectivities did well in the first half, with gold and platinum making major contributions. Tea, coffee and wattle had good first-half profits, although sug-ar was hart by the fall in world

The subsidiary Princess Properties International, with six botels in Mexico, Bermuda and the Bahamas, is likely to exceed last year's results, the company said.

Lourho said the Audi and Volkswagen car-importing business and manufacturing ac tivities are performing well.

Baxter Predicts Savings on Merger

(Continued from Page 11) be joined with Baxter's stronger

overseas operations. Mr. Loucks said revenues could be increased as a result of the merger by passing hospital supplies produced by Baxter's low-cost manu-

facturing plants through American's highly regarded distribution system. "A lot of what they do is similar to what we do," Mr. Loucks said.

"Some of our automation capabilities should be applicable in their plants and vice versa." In addition, he said Baxter should benefit from the computerized system for ordering supplies that connects many hospitals with American.

He also said that the cash flow produced from the merger would turn the combined company into a research and development power-

"Today you need substantial cash flow to fund this type of re-search," Mr. Loucks said, "and I see this as a major reason for the

"We've been going through a pe-riod in which the health-care indus-try has really been shrinking," Mr. Loucks added, speaking from his office in Deerfield, Illinois, a suburb north of Chicago. "It seems to me that the ability to survive depends on being the low-cost pro-ducer and that depends on scale."

share fell to 30 cents a share from earlier.

ings of \$43.6 million in the second 34 cents. Sales for the quarter were quarter, down 8 percent from \$47.4 \$499.8 million, up 6 percent from million a year earlier. Earnings per \$473.5 million in the quarter a year

Banks Sell, Swap Latin Debts

(Continued from Page 11) oresident at Shearson Lehman

Brothers, one of the firms that arranges the loan swaps and sales. "If you're going to give new money," she said, "and you trade paper at a discount, that doesn't look so good — especially if your chairman is calling up regional

banks and trying to get them to contribute new money. Sales volume of Latin debt picked up enough to be called a market in late 1983, brokers said.

Small- and medium-sized banks in the United States and abroad are the primary players in the market.

About a dozen brokers are significant players in the market, put-ting buyers and sellers together. They range from small investment banks, such as Giadefi and Leslie, Weinert & Co., to large financial houses like Shearson Lehman and Salomon Brothers.

Many commercial banks, such as neer and that depends on scale." Citicorp, Bankers Trust and Mor-Baxter Tuesday reported earn-gan Guaranty, also arrange the

very cautious about the entire mar- enormously, and are dropping unket, and they usually go through der competitive pressure, but they intermediaries," said Christine A. still range up to 1 percent, and Bogdanowicz-Bindert, a senior vice sometimes more.

There are no hard figures, but estimates put the market total at about \$3 billion worldwide in 1984, mostly in swaps. That pales compared with the amount of foreign loans outstanding, with \$360 biltion in Latin American foreign debt

Nonetheless, the deals offer some inkling of what foreign debts may really be worth, although everyone cautions that the discounts

are only the roughest of indicators.

Loans to Bolivia, which is more than a year behind in interest payments and which suffers from possibly the most chaotic economy in the world, sell for about 20 cents on the dollar, Peruvian debt, under the woes and a guerrilla war, trades for half of its face value. Argentine the dollar, while loans of Venezuela, probably the least troubled Latin debtor, sell for about 90 percent

66Significant increase in half year results with record profits99

RW Rowland, Chief Executive

Jean Standalow

I am pleased to report a significant increase in the half year results to March 1985 with

Profit before tax has risen by 33 per cent. to £70.7 million and profit attributable to shareholders at £28.8 million is up by 23 per cent. compared with last year.

In the United Kingdom, the Audi and Volkswagen car distributorship, and manufacturing activities, are performing well. In the current year Lonrho's total sales of new vehicles in the United Kingdom alone will exceed 150,000 units, thereby making us the largest distribution network. The partial closure of Crockfords for re-decoration during the first half of the year affected the overall results of our ten casinos. A new casino in Queensway, London, has been

licensed to operate and is being prepared for opening. Overseas our mining activities have done well in the half year, with gold and platinum

Princess Properties International, which owns six hotels in Mexico, Bermuda, and the Bahamas, together with the Bahamas Princess Casino, is likely to exceed the results of last

Agricultural reports are mixed for the half year, with good profits from tea, coffee and wattle, whereas sugar has been affected by a fall in world prices.

In May, Lonrho Finance Plc, a wholly-owned subsidiary, issued U.S.\$40 million 6¼ per cent. Convertible Bonds Due 2000. The Bonds are unconditionally guaranteed by, and convertible into Ordinary Shares of, Lonrho at 185p per share. The fixed rate of exchange for conversion is \$1.2385 to £1 and therefore on full conversion 17.5 million shares would be

Profit Projection

I am confident that 1985 as a whole will be a highly satisfactory year, particularly as Lonrho traditionally shows an improved second half.

The Annual General Meeting of Riunione Adriatica di Sicurtà was held in Milan on 25th June 1985 with Mr. Franz Schmitz in the chair. The Meeting adopted the Company's Accounts for the year ended 31st December 1984, highlights from which appear on the right.

After a transfer of Lit. 16 bn. to reserves, the net profit amounted to Lit. 20.4 bn., 36% higher than in 1983, and a dividend of Lir. 1,000 per share was declared that will be payable as from 16th July 1985. In their Report, the Directors state that premium income from direct business in Italy reached Lit. 1,000 bn., an advance of 17.2% on the previous year.

Growth in the Life Branch was again most satisfactory, with premium volume up by 27.3%. In the General Branch, a creditable increase of 14.9% was achieved. Underwriting results show an overall improvement, though losses continue to be incurred in some accounts, notably Third-Party Motor Liability.

The Company's total investments amounted to Lit. 2,307.7 bn., which produced net income of Lit. 214 bn., a 28% improvement over the previous twelve months.

As Extraordinary Business, the Annual General Meeting approved proposals to merge two wholly-owned property subsidiaries into RAS, to delete the so-called "acceptability clause" from the Company's Articles of Association and to reduce the minimum and maximum number of Directors and Statutory Auditors permitted by the Articles.

Elections to the Board and Statutory Audit Committee were made accordingly. Franz Schmitz, Detley von der Burg and Umberto Zanni were reelected Chairman, Deputy Chairman and Managing Director respectively.

STUBBORN CHILD

By Mark Devlin. 255 pages, \$14.95. Atheneum, 597 Fifth Avenue, New York N. Y. 10017.

Reviewed by John Gross

WHEN Mark Devlin was admitted to the Roslindale Detention Center near Bostor in 1956, he was locked in a room where it was pitch-black. He began screaming for his mother. When he heard a jingle of keys, he was convinced she had come to collect hum; instead, a face looked in through a small opening, warned him in obscene terms what would happen to him if he did not shut up, and told him (with an additional obscenity thrown in) that his mother wouldn't be seeing him again

for a good long while. He was 7 years old.

The odds had been stacked against him from the beginning. His father, he reports, was an alcoholic who seldom returned home, and who beat and abused him when he did. His mother — a neglectful parent, according to a local agent of the Society for the Prevention of Cruelty to Children — had taken up with a man called Bill; she assured the authorities that all five of her children, including Mark (the aldeet) areas may feed of him but it we (the eldest), were very fond of him, but if we take Mark's word for it he was "always drunk and mean." As Devlin writes. "I did not know whom I hated or feared more, Bill or my

With a start like this, it is not to be wondered at that early on he displayed a plentiful assort-ment of behavior problems. Having to teach or look after him was clearly no picnic, and it seems evident that he needed at least some outside care. What happened, however, is that under a Massachusetts statute dating from the 17th century his mother filed a "Stubborn Child's complaint," Social workers and child psychologists concurred, and for the crime of stubbornness he found himself condemned to spend most of his childhood in a series of

fearsome state institutions.

His reception at Roslindale set the tone for a great deal of what was to follow. "Stubborn Child" is in large measure a chronicle - a fierce and memorable chronicle - of cruelty, deprivation and indignity. Most of the teachers Mark Devin encountered seem to have had little if any interest in teaching, most of the guards seem to have been bullies; there were kicks, blows, savage insults and frequent recourse to solitary confinement under the most

rigorous conditions.

Whatever its nominal purpose, the system in which Devlin found himself immured might have been designed to destroy any sense the

strength (encouraged by a Boston journalist named Mark Zanger) to write "Stubborn-Child," under circumstances that make it allthe more noteworthy an achievement. Solution to Previous Prazie John Gross is on the staff of The New York

annates still had of their worth. And we ex-

In participation Devin had the good fortune to come across music teacher who taught him the clarines and generally widened his horizons. There is a fair account of hearing about Richard Strang.
"Till Eulenspiegel" for the first time, and distifying with the hero of that work, who are hanged for what are nothing worse that pranks.) An aris and crafts teacher gave him. encouragement, too, and so did a boxing is structor — before illness intervened, he got a far as the semifinals of the Golden Gloren-And, chiefly by reading Perry Mason - ** have to start somewhere - he developed feeling for words.

If his gifts did not carry him further, much of the fault seems to lie in his troubled relation. ship with his mother. She rarely visited him or: wrote to him; she was capable of sending him a letter at Christmas listing the presents she had bought for his brothers and sisters, and then adding that she was sorry she didn't large enough money left to get anything for him. Whenever he came home on parole, his difficulties there soon led to his being sent back into detention. Still, institutions are meant to be stronger

than individuals, and it is the system of jame-

nile care (or an important aspect of it) that stands arraigned in Devlin's account, rather than the inadequacies of a woman beset by

problems that might have proved too much for

most of us. His indictment of the system is a

powerful one, and makes disturbing reading True, two of the institutions to which he was consigned — and others like them — have been

closed; the category of "Stubborn Child" was

abolished in Massachusetts in 1974; new provi-

sions have been made in the state for therapy, counseling and foster care. But it would take an uncommon degree of optimism to assume that the evils he describes have disappeared, or

that comparable abuses do not exist elsewhere,

was 25. In the years that followed he managed:

to stay out of jail - only just; he records in

ON the diagramed deal, South landed in five hearts doubled after a competitive auction and had an easy road to 11 tricks when West led the spade ace. He ruffed, drew trumps ending in dum-my, and cashed two spade winners throwing diamonds. When South then ruffed the last spade and led the diamond king he was safe: the defenders would be endplayed sooner or later, and as it happened, it

It might seem that South

as he realized afterward the

BRIDGE

contract was impregnable. If West led a club for East to ruff, the diamond king would later provide a club discard and there would be 11 tricks. If West made the best lead of a trump, South would win in the dummy and lead a diamond. East would rise with the ace and lead a second trump. The diamond king would again furnish a club discard and the last diamond would be ruffed. Then a club lead to the jack would force West to give away a trick, and West's remaining

honor would be ruffed out.

about \$50 a month. Cruz also discovered sports. At first, he kicked a soccer ball around with the other 11-year-olds in the neighborhood. But one day, at the urging of a friend, he showed up for basketball practice at his elementary school. The coach, a stocky, strong-willed former soccer player named Luiz de Oliveira, saw a tall, gaughy kid watching with interest from the sideline

and approached him. That meeting began a relationship that has endured

: "To be honest. I didn't want to play basketball."
Cruz said. "I didn't want to do anything. A Iriend of mine asked me why didn't I join. I told him that I go

home and have fun playing soccer or something."

"When he first started, there was no way of telling he'd be an athlete," de Oliveira said, "He was just 11. But after two years' training, I knew. Joaquim could've been a very good basketball player because he had

coordination, even at an early age."

Cruz did not continue to play basketball for long.

The same boy who had told Cruz about basketball whispered in de Oliveira's ear about Cruz's running prowess. De Oliveira had him run 1,500 meters after basketball practice one day. Cruz, then 14, was clocked at 4:45, and de Oliveira told Cruz to forget

basketball and concentrate on running. De Oliveira knew that Cruz's ability could be a way for each to find a better life. The only problem was, Josquim did not want it. Or, if he did, he apparently was not willing to work for it. For a few months, Cruz went to school and coached a youth basketball team, a

job arranged by de Oliveira, who still had hope that Juz would change his mind. "T" I stopped the car one night, looked over at Jos-"Quim and we talked," de Oliveira said. "I explained to him that track and field would be good for him in the future. It would be a chance for him to come to the U.S. and learn English and get an education. I told

people, help his family. He really wanted to help his Cruz, who had been looking for some purpose to Un, now had it.

him that it would be a chance to travel, meet different

After only a month of training, Cruz, then 15, ran stremely fast times in both the 800 and 400 meters. Je Oliveira consulted veteran track coaches to immove his knowledge of middle-distance running, but

re already had provided Cruz with an excellent base. When Cruz was 17, he was unbeatable in his age Joup. His father took time off from work to watch his in run. That meant a lot. Joaquim Cruz Sr. died of a eart attack in 1981, at 50. He was ill for the two years refore his death, and had been forced to switch to a

His father's death hit Cruz hard. But when it came

to running, it made him more motivated than ever, Two months later, in Rio de Janeiro, he ran a 1:44.3 in

"It took a long time to get to that point," de Oliveira said. "But once Joaquim got there, we knew it was time to move on."

The move they had in mind was to the United States. Where in the United States, they were not sure. But Brazilian middle-distance runner Agberto Guimaraes was attending Brigham Young University and arranged to have Cruz admitted to the school. De Oliveira sold his belongings and moved his wife and three children to Provo, Utah, to be with Cruz.

Cruz's first few months in the United States were disastrous. It was not just the snow, which he had never seen before, and the culture shock. A tendon problem in his right heel had bothered him earlier that year and had followed him to the United States.

So, when it was suggested that an orthopedic sur-geon, Stan James of Eugene, Oregon, examine the heel, Cruz and de Oliveira also examined Eugene. They liked the area, which is considered a runner's haven. Continuous rain was better than continuous snow, Cruz thought,

Another factor, which has been played down, was that de Oliveira later would be offered sponsorship by Nike to coach Cruz and other athletes. Nike is based in Oregon, Even after moving there, Cruz still was bothered by the foot, so he underwent surgery in Houston

"The recovery was very tough on me and Luiz," Cruz said. "Luiz got a lot of criticism back home. When we left the country, a lot of people were saying that I wouldn't be able to run good times anymore if I

came to the U.S. and that I'd get burt. It looked like they were right. "On one side, it was very bad because I wanted to prove I could run but I couldn't. But on the other side, it gave me time to rest my body. It gave me time to study and learn the language."

It took many hours of studying for Cruz to speak, read and write English. He failed the University of Oregon's admission test three times before passing.

Evenmally, the doubts about re-covering from the heel injury began passing, too. With the aid of a spe-cial, built-up shoe, Cruz was able to start training again. It was slow and arduous, but it lifted his spirits.

arduous, but it lifted his spirits.

Then he was able to compete for the University of Oregon. In 1983, he won the NCAA 800 with a time of 1:44.91, which was surprising to de Oliveira because Cruz's training was not geared to the NCAA meet. By the summer of 1983, at 20, Cruz was considered a world-class 800. was considered a world-class 800meter runner but by no means a favorite. At the World Champion-ships in Helsinki, he finished third in a race he said he should have won. Accustomed to taking the lead, he went out too fast and faded

family.

"I was surprised," Cruz said. "I thought I was going to win. A day before the race, I pictured myself winning 100 times. And I pictured That is the first response. The myself running in front I never second response is: We are all begive myself a chance to picture me ingused, made to jump around like more flexible."

Maybe that loss was the best thing, because be came back last year with an insatiable desire to win. He easily won both the NCAA 800 and the 1,500 that spring, then started pointing

toward the Olympics. The 800 field, featuring Coe, Ovett and Earl Jones and Johnny Gray of the United States, was considered the deepest and strongest of any track event at the Games held in Los Angeles. After breezing to fast times — too fast for his own good, some thought — in the preliminary heats, Cruz had the competition

Said Coe on the eve of the race; "He's either in supreme physical condition or foothardy." Cruz answered that question as the late afternoon

sun beat down on the track on Aug. 6. For the first 400 meters, Cruz followed the pace of Kenya's Edwin Koech, his long fluid stride never wavering. As the runners reached the stretch, Cruz a strike would be a failure on both seemingly did not change stride, yet he pulled away from the field.

Coe and Jones. Grabbing a Brazilian flag from a of a sudden, the commissioner was spectator, Cruz proudly waved it on his victory lap. He not the commissioner any more, had become the first Brazilian runner to win a gold but merely an anguished fan like

Eduardo Romero of Argentina found himself very trapped near the fourth green at the Royal St. George's Golf Club. He shot 74 for the opening round of the British Open.

Other' O'Connor Breaks British Open Records With a 64

By Martin Lader

SANDWICH, England - One of the great names of Irish golf returned to the British Open on Thursday, like a ghost looking to put to rest a mission started 30 vears ago.

Starting in the mid-1950s. Christy O'Connor Sr. won almost 60 tournaments, but never the open. Seven times he finished among the top six, placing second in 1965 and third in 1961 but never achieving the clusive prize.
"Himself," the nickname by

which he is known in Ireland, is 60 now and never will add the British Open to his collection of trophies. But the name Christy O'Connor was very much in presence during the first round at Royal St.

George's Golf Club. Christy O'Connor Jr., named for his uncle and a journeyman player in 16 years as a pro, went on a binge the likes of which his storied uncle never knew. Starting on the fourth hole, he carded seven successive birdies to set a British Open record. He got 10 birdies for the round. eved to be another mark.

During the run of seven birdies.

from 12 feet and one of 10 feet. Later in the round he made birdie putts of 15 and 20 feet. He finished with a 6-under-par

64, tying an open record set by Craig Stadler two years ago for low opening round. The championship record of 63 is shared by Mark Hayes (1977) and Isao Aoki (1980).

Five men were tied for second at 68: David Graham of the United States. Tony Johnstone of Zimba-bwe and Sandy Lyle. Philip Parkin and Robert Lee, all of Britain. But while O'Connor was enjoy-

ing his finest hour, more famous golfers were thrushing through knee-deep rough and wet dunes.

Jack Nicklaus hit a tee shot out of bounds at 14 and carded 77. Seve Ballesteros of Spain, the defending champion, bogeved five of six holes during the worst of a bravy rain and shot 75. Bernhard Langer of West German, and Tom Watson

shot 72, Lee Trevino 73. O'Connor's 64 also broke by one shot the course record set in 1934 by Henry Cotton, when he won the

first of his three open crowns. Cotton, now 78, afterward con-gratulated O'Connor, 36, asking, "Did you play all 18?" Cotton said. The boy is very gentle. Whether he has enough viciousness" to win the open "I don't know. I told him. I

hope this helps you."

O'Connor, whose hair is mostly white, with patches of gray, said he lacks the intensity and toughness that characterized his uncle, with whom he has always been close.

"He was more positive, with nerves of steel," he said, "He'd give the impression of being relaxed. but he was always very intense. He often told me he played with blinkers -be saw nobody and heard nobody. When the round was over, then he was nice to everyone.

"I'm a different golfer than my uncle, different swing, different outlook.

Growing up in Galway, where the golf course runs through the middle of the village. O'Connor and his three brothers were proud of their uncle. But there were problems attempting to follow those hallowed footsteps.

"At first it was difficult to live with the name, with everyone expecting me to play as well." O'Connor said. "After a while people recognized I wasn't as good, and I was quite happy about that."

Those Lords of Baseball Must Be Crazy

By George Vecsey New York Times Service NEW YORK - The first response is: They cannot do this to

Major league baseball's owners and the players' union could not be professionally stupid enough to force another midseason strike the way they did in 1981, when they got off lucky. Fans and the press bought the gimmick of the intradivisional playoffs, they accepted the distorted statistics from that season, and then baseball stepped in good fortune with a World Series that matched the two biggest television markets in North America, New York and Los Angeles.

Now they want to try again. The Now they want to try again. The two sides are playing brinksmanship with an Aug. 6 strike deadline, using the cynical explanation that there will be plenty of time to settle a strike and get back to work in time for the playoffs. What playoffs? What World Series?

- That is the first response. The losing. But I wasn't prepared for greyhounds chasing a scented methat hard of a pace. I learned to be chanical rabbit. As soon as the na the players rinck Frack themselves into a strike deadline, the fans and the press tock their tails between their legs.

> In any other business, a strike deadline three weeks away would elicit yawas. But this is the national pastime, with all the emotional weight of history, with all that time on television and radio, with all that snace in the newspapers. And both sides know they can score points with the public by raising the specier of no baseball in the dog days of summer.

Even the commissioner is doing it. Peter Ueberroth was quoted the other day as saying he thinks a strike is likely, and the sooner the better. He did urge owners to open their books, and he did suggest that sides, but baseball can hardly af-ford the Cheshire-cat fadeout we When he hit the tape, Cruz was five meters ahead of saw from Bowie Kuhn in 1981. All the rest of us.

that complicated. There is no philo-sophical, legal difference between and the inept clubs throw around the sides, as in the bad old days huge salaries with the same aban-when players were kept in bondage don as the rich and successful by their clubs until traded, sold or clubs. The owners all look like men

Just money: tacky, gross money. This strike would be over the share of money the owners pay the on both their houses. We can get players pension plan from the tele-along without it. Sure we can players' pension plan from the tele-vision network contract. The own-and both sides know it, don't they? ers have traditionally paid onethird, which now amounts to \$15.5 million. But the television contract is so big now that one-third would amount to \$60 million.

The owners do not want to formalize the one-third figure. But, given the contemporary players' benign neglect of old-timers' pensions, it is hard to get worked up over their struggle for one-third of

A Truck Named Clyde

By Russell Baker
NEW YORK — This is the IN LW TORK — This is the ing unnecessary assistance to the highway patrol, would probably pay good money to put a result of the highway patrol, would probably pay good money to put a result of the highway patrol. ing way up in the air on huge tires. Grotesque.

Way up in the air behind the steering wheel sits a 98-pound woman. The front of the hood commonly bears a handsomely painted name, usually "Clyde."

People who understand pickup trucks tell me these trucks with the tire bloat are not serious trucks. Serious pickup trucks must be big enough to transport 30 pine boards 8 feet long, a tractor-style lawn mower that has to go back to the shop for repairs, 200 feet of garden hose, three big evil-tempered dogs who don't like to feel crowded, two cases of beer and six bushel baskets of fresh-off-the-pitchfork stable manure to spread on the vegetable

patch. All at the same time. For this reason, the experts tell me, serious pickup trucks favor very modest tires that keep them reasonably close to the ground. For one thing, getting a tractor-style lawn mower on a pickup truck is apparently never any fun, but if your tires elevate the truck bed to the height of your living-room celling, the job will require the help of six hod carriers supported by an

ambulance crew on standby, Moreover, serious pickup trucks never have names. A serious pickup truck is called simply "The Truck."

A relative of mine whose experience in pickup trucks is extensive cites many reasons for not naming them, the most obvious of which is that "your friends who got trucks would never stop laughing if they heard you say, 'Clyde needs a new church'"

clutch. Another reason, of course, is that people who drive serious pickup trucks are themselves usually named Clyde, Emie, Lou, Floyd and — like my above mentioned relative — Mike. None of them would tolerate having his name painted on his truck in graceful,

flowing script since:

1) Anybody who allowed graceful flowing script to be painted on his truck would probably wear clothes with little alligators sewn

2) Anybody silly enough to paint

pay good money to put a vanity plate on his secondhand Chevy Malibu.

What it comes down to is that these gigantic tires supporting little trucks named Clyde are not serious trucks, but sports trucks. But why such grotesque proportions for a sports truck? Sports cars tend to be

small and graceful. The explanation seems to be that the ugliness, gracelessness and dis-proportion of the things give them beauty in the eyes of their opera-tors. The technical justification is that bigger tires give better traction for the sport their drivers relish; to wit, accelerating erosion by chewing up mountain landscape, coun-

My theory, though, is that there's more behind those big tires than youth's natural arge to dismantle the Earth in the most amusing fashion possible. It's my theory that those big ures are part of some-thing bigger; namely, a galloping case of bloat that infects almost everything American these days.

try lanes and seaside beaches.

We all know about the Pentagon budget bloat. The sports bloat gives us football into the summer dog days, almost eternal basketball, baseball until Thanksgiving Eve. Because of political bloat, presidential campaigns now run at high pitch for two endless years, and television bloat gives us so much vicarious life to enjoy that we have little time to tend to lives of our own, which leads to the divorce

Then there is the ingestion blost, Recently, while being forced into a ditch by a sports truck named Clyde, I looked way up toward the driver's seat and saw that the 98-pound woman at the wheel was drinking a Super Big Guip. That's a non-alcoholic concection being sold by an Eastern chain of convenience stores, which boasts that the buyer gets 44 ounces for 59 cents.

Forty-four ounces! That's almost a quart and a half. I recall when Pepsi Cola gave you "12 full ounces — that's a lot." It was a lot, too. Super Big Gulp now gives you almost four times as much. That's not just a lot. That's just bloat.

New York Times Service

Currency Tales: Cows, Guns and Ashes

Damaged U. S. Banknotes Can Be Restored; All You Need Is 50 Percent of the Pieces

By Neil A. Lewis New York Times Service

WASHINGTON — Eight years ago an lowa farmer discovered that he had dropped his wallet, containing \$600, while working the fields. When he could not find it he surmised that it had been eaten by his cow. The man slaughtered the animal and sent

the contents of its stomach to a little-known agency in Washington that tries to redeem mutilated currency. The farmer's fortunes turned out better than the cow's: The currency examiners were able to piece together most of the bills, and he received a U.S. government check for \$473.

"He had to send in part of the stomach because some of the bills were stuck to it," recalled Rudy Villarreal, chief of the Office of Currency Standards in the Bureau of Printing and Engraving. Last year the agency's currency sleuths dealt with almost 40,000 cases and paid out about \$14 million.

"Some people just don't like banks, aid Lolita Coleman, who supervises a group of 22 currency examiners. She and her staff have been asked to work on bills shot from guns, scrubbed in washing machines, chopped in a cocktail blender and poached in a waterbed. They have dealt with soaked money that was dried in a microwave oven (microwaved cash looks natural enough but crumbles when

The typical claims involve money burned in fires or airplane crashes, or bills buried by someone mistrustful of banks.

There are other reasons people put their money into the earth. In 1975, the demolished site of what had once been a successful brothel in Charlottesville, Virginia, yielded several jars filled with what appeared to be money. It was earnings from the business. But after

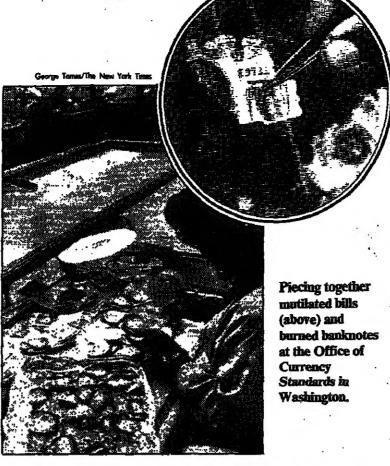

many years the wages of sin were moldy and mildewed. The bills were stuck together in solid clumps and were barely recognizable. The jars were sent to the mutilated-currency office, and the lucky finders got \$15,000.

The currency examiners work in a wellighted room in an annex of the Bureau of Printing and Engraving, across the street from the Mint in Washington. "It's tedious work," Coleman said. "Everyone comes in here with good eyesight and pretty soon they need eyeglasses."

The government pays off if the examiners can reconstitute at least 50 percent of a bill,

As she spoke, Sherita Walker, using a magnifying glass, a small metal spatula and for-ceps, was working on what looked like a pile of ashes in a desk drawer.

The drawer had been sent in by a sign company in Memphis, Tennessee, saying it had been caught in a fire and contained \$400

to \$500 in \$20 and \$100 bills, "I've found mostly ones and fives so far and only one 100dollar bill," Walker said.

Nearby, Leola Blackwell was working on a pile of \$100 bills forwarded by a bank in Miami for a client who wanted to redeem a claim of \$85,000. The bills were soaked and bonded together in piles, but Blackwell said they were easy enough to peel apart. None-theless, the owner may not get his money so

Most cases of more than \$5,000 are referred to the Internal Revenue Service, always interested in how and why people have large amounts of cash. This, and the money's coming from Miami, where the authorities say illegal drug money abounds, ensures that the claimant will get a visit from the IRS

before he gets his cash free and clear. Several examiners recalled the case of the man who hid several hundred dollars in the barrel of his shotgun and forgot about it until he went bunting. He set his sights and produced cash confetti. He got only some of his money back, they said.

The largest case so far involved an armored car that burned when its gas tank exploded two years ago. "We had everyone in the office working on that," said Coleman, adding that the examiners' office was able to redeem the entire \$2.5-million claim. "There was a lot of overtime on that one."

Like bank tellers, the examiners deal with far more money they they will ever own. Most are paid \$14,000 to \$18,000 annually.

Villarreal advises anybody who has mutilated U.S. currency not to disturb it further

but wrap it in soft packaging. Often a bank will arrange to forward the package to Wash-ington, but it can be sent directly to the Department of the Treasury, Bureau of Engraving and Printing: OCS, Room 344 BEPA; P.O. Box 37048; Washington, D.C.

Expect to wait up to six months for an answer. The service is free.

The British government says it will waive £190,000 (\$266,000 dollars) in value added tax due on tickets for the London part of the Live Aid concert. The government came un-der severe criticism earlier this year for refusing to waive £750,000 in taxes on sales of "Do They Know It's Christmas?" the single record-

A public health officer has opposed plans to let 800 live flies be used in a play to be staged in Salzburg. The flies are supposed to sit on a dunghill in "Der Theatermacher" (The Theater-Maker), a new play by the Austrian arriver of cancer His wife new play by the Austrian writer eye because of cancer. His wife, Thomas Bernhard. The health officer said the flies posed a risk to the about leaving the show. "He's cutaudience and the plan could go ting back, definitely, but he has to," ahead only if the theater guaran- she said. Perkins's assistant, Jim teed that all 800 would be caught Fowler, will take over "Wild Kingalive after each performance. Claus dom." Perkins still plans to travel Peymann, an Austrian fly-trainer and do television specials, his wife

> Jane Byrne, whom Harold Washington unseated to become Chicago's first black mayor, has announced as expected that she will run for mayor in 1987. . . . 🖸

Pilar Juncosa, widow of Joan Miró, has agreed to give the Spanish government 24 of her husband's paintings in lieu of taxes. Javier Solana, minister of culture, said the paintings, done between 1935 and 1969, and 243 engravings would go on public display in September. He said this was the first application of a new Spanish law allowing donations of art in place of money for income taxes. The artist died in December 1983. D

Bantam Books printed the two-millionth copy of Lee A. Iacocca's "Iacocca: An Autobiography" just nine months after the Chrysler chairman's memoirs bit the book stores. Among the only other adult hardcover books to pass the two-million mark are "Power of Posi-tive Thinking" by Norman Vincent Peale, "Jonathan Livingstone Seagull" by Richard Bach, and Marga-ret Mitchell's "Gone With the

Tenants of the San Remo, a posh building on Central Park in New York, have rejected a bid by the rock star Madouna to buy a \$1.2million apartment there. The San Remo Tenants Corp. did not make public its reasons for the decision. It's Christmas?" the single recorded by Band Aid.

Among celebrities living in the building are the actor Dustin Hoffman and the actress Diane Keaton. The New York Daily News reported that Keaton was the only tenant neered techniques of filming animals in the wild, is leaving as host
